SNJC Second & Walnut Sts. (Incinnați, O.

NOVELTIES AND SPECIALTIES—Continued.

BEET, CROSBY'S EGYPTIAN.

As an early variety it has no equal. It is much thicker than the original strain, quite as early, of better besides being smoother. We have no hesitation in pronouncing this the best early Beet yet offered. 10c. oz.; 25 cts. 1/4 lb.; 70 cts. pound.

BEET, DETROIT DARK RED TURNIP.

Its small upright-growing tops, early maturing and the plendid shape and color of the roots make it popular with every one who plants it. Color of skin dark blood-red, flesh, bright red, zoned with a lighter shade, very crisp, tender and sweet. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

MIXED BEETS.

This mixture will furnish your table with the very earliest beets, and continuous supply thereafter through the summer, fall and winter. 10 cts. oz.; 20 cts. 1/4 lb.; 50

CABBAGE, THE VOLGA

It is remarkable for uniformity and solidity, the heads being of about equal size and weighing from 12 to 15 lbs. It is extremely hardy, and like all vegetables that come from cold countries, is remarkably quick-growing, maturing heads fully two weeks earlier than any of our lategrowing kinds. The quality is very fine, the flesh being exceedingly firm, tender and white. 25 cts. oz.; 75 cts. 1/4 lb.

CABBAGE, LOUISVILLE EARLY DRUMHEAD.

Originated in this market and is now the principal market variety and can not be surpassed. Early heads of very large size and very solid, the best and surest heading for all purposes, and will stand the entire summer without bursting. / 20 cts. oz.; 50 cts. 1/4 lb.; \$1 75 lb.

CABBAGE, VERY EARLY ETAMPES.

Similar to the Jersey Wakefield. The plants are lighter colored, but not quite so hardy. The heads are fully as large, not quite so hardy, but are of excellent quality. Sold also as "Earliest of All," "Wonderful," etc. 20 cts. oz.; 50 cts. 1/4 lb.; \$1 75 lb.

CABBAGE, EARLY SPRING (THE EARLIEST FLAT-HEADED VARIETY.

It is of the type of the early "Allhead," resembling it in habit and growth, but is smaller and is nearly as early as the Wakefield. The heads have few outside leaves, and these are small and grow so close to the head that they can be planted very close together. It is round in shape, slightly flattened, very solid, even before the cabbage attain their mature size. 20 cts. oz.; 50 cts. ½ lb.; \$1 75 lb.

CAULIFLOWER, DANISH GIANT.

A large heavy sort, maturing soon after our Earliest Dwarf Erfurt. It is without exception the best and surest heading of all for summer use. 20 cts. pkt.; 80 cts. 1/4 oz.; \$2 75 per oz.

CORN, "PEEP O' DAY."

Earlier than any other; tender, sweet. The cob is white, kernels pearly white, ears delicate and dainty, exceptionally good for early market or home consumers. No market gardener can afford to be without Peep o' Day. It will prove a money-maker in any garden. 15 cts. pt.; 25 cts. at.

CORN, WHITE MEXICAN.

White Mexican is a heavy yielding, early maturing Sweet Corn. It ranks in class with White Cob Cory and is a better yielder. Height, 4 feet; ear about $6\frac{1}{2}$ inches long; quality good. 15 cts. pt.; 25 cts. qt.

CORN, PREMO EARLY SWEET.

Premo can be planted fully as early as the Adams, for the young plants withstand slight frosts, while the other varieties are tender and the seeds will rot if planted before the soil becomes warm. The stalks grow about five feet high, and are very vigorous, generally bearing two welldeveloped ears to a stalk. 15 cts. pt.; 25 cts. qt.

CORN, WHITE EVERGREEN.

This valuable Sugar Corn is a distinct improvement over the old Stowell's Evergreen. It produces handsome ears, well filled with deep grains of pure snowy whiteness, and of the most delicious sweetness. 15 cts. pt.; 25 cts. qt.

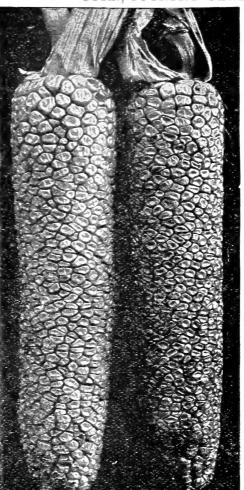

CORN, OHIO MONARCH.

A cross between the well-known "Mammoth" and Stowell's Evergreen, it resembles the former in size of ear, but is fully 12 days earlier. Like the Evergreen, it has a deep grain and the advantage of remaining a long time in the green state, but far supersedes that standard variety in productiveness. 15 cts. pt.; 25 cts. qt.

CORN, ZIG ZAG EVERGREEN.

This variety of Evergreen Sweet Corn is one of the best for private use, market gardeners and canners. It is of extra quality, very sweet and juicy in the green state. It ripens about the same time as Stowell's Evergreen, and is superior to that well-known variety in sweetness and flavor. 15 cts. pt.; 25 cts. qt.

CORN, COUNTRY GENTLEMAN.

The ears are of good size and produced in great abundance, bearing three to four good ears to a stalk. The cob is very small, giving great depth to the kernels, which are of pearly whiteness. But great merit of the Country Gentleman Corn is its delicious quality. It is without

doubt, the sweetest and most ten-der of all sweet corn, and at the same time with ears of good size. 15 cts. pt.; 25 cts. qt.

We are Headquarters

American Grown

Grass Seed.

Country Gentleman.

It sometimes happens we can supply other varieties than here mentioned. If interested, write us what you wish to buy and quantity required. If possible we will quote special prices.

CUCUMBER, DAVIS' PERFECT.

As is well known to many persons, Mr, Davis is the orignator of the Davis Wax Bean, and Grand Rapids Lettuce. His perfect Cucumber is not only an ideal greenhouse variety, but a profitable one for truck gardeners to grow out-of-doors. Color, dark glossy green. This cucumber is a very shy seeder. The few seeds in each one are so small and tender as to be hardly noticeable when eating. 20 cts. oz.: 50 cts. 1/4 lb.

CUCUMBER, EARLY CYCLONE.

This is one of the earliest cucumbers in cultivation, and is of the most desirable White Spine type. It is shorter and thicker and holding its deep green color better than White Spine or other early cucumber in cultivation. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

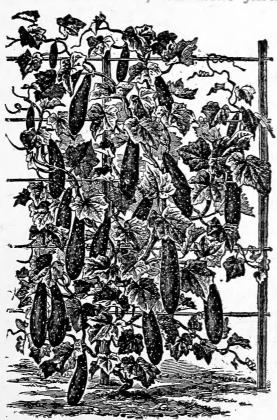

CUCUMBER, CUMBERLAND.

This new variety is of the improved White Spine type, and a decided acquisition to our list. Particularly it is valuable for pickles, besides combining fine qualities which make it an excellent table sort. The color is deep green, shading to whitish at the tips; flesh firm and very crisp and tender at all stages. The pickles differ from all other sorts in being set with fine spines over the entire surface, except at the extreme ends. 10 cts. oz.; 25 cts. 1/4 lb.; 80 cts. lb.

CUCUMBER, CINCINNATI PICKLE.

The fruit of this variety is of medium length, with large and prominent spines, and begins to set while the vines are quite young; color is a deep green, the ideal for a pickle. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

CUCUMBER, CLIMBING JAPANESE.

It is strong and vigorous, the vines attaining twice the length of common varieties. It is prized for its prolific and hardy qualities, a single vine bearing from 50 to 75 fruits 10 to 12 inches long, The fruit is of a dark green color, has a delicious flavor, The vines are proof against mildew, never suffering from wet weather or insects.

Oz., 15 cts.; 4 lb., 40 cts.; 1b., \$1 00.

Japanese Climbing.

KALE, DWARF GREEN CURLED SCOTCH.
Grows about 12 inches in height and spreads, under good cultivation, to three feet in diameter. The leaves are bright green, beautifully curled and very tender. Allow to get a slight touch of frost before using, 10 cts. oz.; 25 cts. 1/4 lb.; 65 cts. lb.

KOHL RABI, WHITE SHORT LEAVED.

Very early, the best for forcing, and equal to any for outdoor culture, Bulb is greenish-white, smooth, of finest texture and quality. Can be planted closely together on account of its short leaves. 20 cts. oz.; 50 cts. 1/4 lb.

LETTUCE, BIG BOSTON.

This variety resembles the well-known Boston Market Lettuce, but produces heads almost double the size and matures a week later. 15 cts. oz.: 35 cts. 1/4 lb.: go cts. 1b.

LETTUCE, WHITE SUMMER CABBAGE.

A bright green, vigorous, sure heading sort which forms a solid head of tender leaves, the inner ones blanched to a beautiful cream yellow. 15 cts. oz.; 35 cts. 1/4 lb.; 80

LETTUCE, SALAMANDER.

Large, solid heads, bright green in color, leaves thick, smooth and tender, does not rapidly run to seed. One of the best of the head lettuce. 15 cts. oz.; 35 cts. 1/4 lb.; \$1 00 lb.

LETTUCE, IMMENSITY.

A gigantic variety, with an enormous solid head of the finest quality, even the outer leaves being tender, It is one of the slowest to run up to seed that we have ever seen, and maintains that crispness of texture and sweetness of flavor that will surely make it popular. 15 cts. oz.; 35 cts. 1b.; \$1 00 lb.

LETTUCE, CALIFORNIA CREAM BUTTER.

A magnificent Butter Lettuce, forming large, round, solid heads. The outer leaves are medium light green, beautifully marbled with brown spots giving it a very attractive appearance. Inner leaves creamy white, very crisp and tender and of rich buttery flavor. Should be sown in early spring for early summer use and if sown in August will be in fine condition for fall use. 15 cts. oz.; 35 cts. 1/4 lb.; \$1 00 lb.

MUSK MELON, TIP TOP.

A yellow-fleshed melon of the very best quality; every melon produced, big or little, early or late in the season, is a good one. They are sweet, juicy, of finest flavor, eatable to the very rine. It is a strong grower and heavy yielder, and of handsome appearance. 10 cts. oz.; 25 cts. 1/4 lb.; 80 cts. lb.

MUSK MELON, ROCKY FORD.

It is safe to say that no melon has ever come into our markets which has sold so readily and at such high prices as "Rocky Ford." The vines are exceedingly healthy and vigorous, and bear an enormous quantity of fruit during the entire season. The melons are of handsome appearance, fine flavor and solidity, the latter feature making it unequaled as a shipper. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. 1b.

NOVELTIES AND SPECIALTIES—Continued.

MUSK MELON, PAUL ROSE.

Cross between the Netted Gem and Miller's Cream, and combines in a remarkable degree the good qualities of both. It is a very heavy cropper; the vines are very healthy and robust, ripening an enormous number of fruits. The flesh is salmon colored, very deep and of fine melting character, with thin, tough rind and small seed cavity. 10 cts. 0z.: 25 cts. 1/4 lb.; 75 cts. lb.

WATER-MELON, "ICEBERG" OR BLUE GEM.

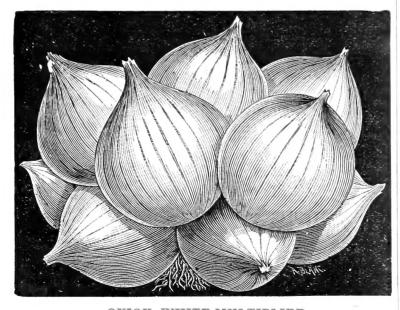

The melons are uniformly large, of thick oval form, slightly depressed at the blossom end. The color is rich dark green with faint stripings of a lighter shade but the whole fruit is much darker and richer in coloring than the Kolb Gem. The rind is exceptionally strong, making it an excellent shipper. The flesh is entirely free from stringiness, and of sweet sugary flavor. 10 cts. 02.; 25 cts. 1/4 lb.; 75 cts. lb.

WATERMELON, KLECKLEY'S SWEET OR MONTE CRISTO.

A splendid sort for new markets. Vine vigorous and productive, fruit of medium size, oval, color dark, mottled green in two shades, forming indistinct stripes. Flesh very bright, rich red, exceedingly sweet and tender. 10 cts. oz.; 25 cts. 1/4 lb.; 70 cts. lb.

ONION, OHIO YELLOW GLOBE.

The finest shaped, best colored and largest cropper of any of the yellow onions, and entirely distinct from the old type Yellow Globe Danvers. 15 cts. oz.; 50 cts. 1/4 lb.

ONION, WHITE MULTIPLIER.

It is very hardy and will prove a grand acquisition to this class of onions. White Onion seed is usually high priced, hence the advantage of a white "Multiplying" onion of this kind. Very useful for pickling. The White Multiplier Onion is enormously productive, and its handsome appearance will make it one of the best salable and profitable varieties that can be grown. Sets 15 cts. qt.; \$1 00 peck. Add 10 cts. qt. for postage.

ONION, AUSTRALIAN BROWN.

Is of medium size, wonderfully hard and solid, and most attractive for markets, both as to form and appearance. They are extremely early and never make any stiff necks or scallions. The color of the skin is a clear amber brown, in marked contrast to that of all other onions. 15 cts. oz.; 50 cts. 1/4 lb.

PEA, J. C. McC'S EXTRA EARLY (PEDIGREE STOCK.)

Being grown in the far North and with the selection of the earliest and choicest vines, this strain has been so improved that it fully bears out our claim as the earliest, most prolific and even strain in existence, maturing so well together that sometimes a single picking will secure the entire crop. Vines, vigorous and hardy, 2 to 2½ feet high, bearing abundantly. Market gardeners, who can not afford to go over the rows several times for small quantities of pods, will well to give this new strain a trial, 15 cts. pt.; 25 cts. qt.

PEA, CARTER'S DAISY OR DWARF TELEPHONE.

It grows about 18 inches high and is remarkable for its abundance of large, well-filled pods. It is a dwarf early form of the popular Telephone. It is of healthy, stocky growth, and requires no brush. Try it. 15 cts. pt.; 30 cts. qt.

PEA, GRADUS (PROSPERITY.)

Extra early, very large pods, Table quality quite equal to Telephone. It is very hardy and can be planted as early as the smooth peas, bears heavy crops; the large peas retain their rich color after cooking and are deliciously sweet. Well worth a trial. 15 cts. pt.; 30 cts. qt. PEA, THOMAS LAXTON.

The introducers for this variety claim that in point of earliness, size of pod and table quality it excels any sort now in use. 15 cts. pt.; 30 cts. qt.

PEA, TELEGRAPH.

Stronger growing and hardier vine, with darker foliage than the Telephone; green peas very large, sweet, and when dry are almost smooth. A splendid sort for both the home and market garden; will give good returns even under conditions that would cause most varieties to fail. 10 cts. pt.; 20 cts. qt.

ro cts. pt.; 20 cts. qt.
PEA, MAMMOTH LUSCIOUS SUGAR (GIANT-EDIBLE
PODDED VARIETY.

Excels all other Sugar Peas in size, productiveness and quality. Vines average about 30 inches in height and remain a long time in bearing. The pods are gigantic in size, broad, sweet and tender, extremely fleshy and equal to the best snap beans for cooking, pods and all. A decided improvement over other Sugar Peas, especially in quality. 15 cts. pt.; 30 cts. qt.

PEA, HEROINE.

Thirty inches. Bears a profusion of long, slightly curved, pointed pods containing 8 to 9 peas of fine quality. An Immense Cropper; yields much more than ordinary varieties. A great favorite for market purposes. 15 cts. pt.; 25 cts. qt.

PUMPKIN—KING OF THE MAMMOTHS.

This is the great Exhibition Pumpkin.

No other ever introduced has reached such enormous weights, and been awarded as many prizes. The flesh and skin are golden yellow, and notwithstanding its enormous size, it makes a good table pumpkin. 15 cts. oz.; 35 cts. 1/4 lb.; \$1 25 lb.

SEEDS have been for Years a Standard Among the Best Gardeners of this Section for Excellence.

RADISH, CINCINNATI MARKET.

This splendid variety of radish originated here and has been grown for a number of years by a few of our largest market gardeners. They guarded the seed as though it was so much gold, and it was only after several years that we succeeded in getting a small quantity. Since then we have grown it ourselves and have been most careful to keep it up to its original high standard. It has a very short top, and is, considering all its points, the best long red radish grown, and a money maker for the market gardener. 10 cts. oz.; 25 cts. ½ lb.; 70 cts. lb.

RADISH, NON PLUS ULTRA.

A very superior early forcing radish. It will mature in 21 days. The tops are small, roots globular and rich bright red color; flesh white, crisp, tender. Very attractive and presents a fine appearance when bunched. 10 cts. oz.; 25 cts. 1/4 lb.; 60 cts. lb.

RADISH, ICICLE.

The roots of this new radish grow about 4 inches long, are of transparent whiteness, with short leaves, and make their growth very quickly. It is of most excellent flavor and equally desirable for home use and market gardeners. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

RADISH, EARLY SCARLET GLOBE.

This variety makes roots fit to pull as early as Non Plus Ultra, but they are much larger when full size. Roots round or slightly olive shaped; color rich deep scarlet; flesh white and tender. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

RADISH, LONG WHITE VIENNA, OR LADY FINGER.

This is of remarkably quick growth, pure white, both skin and flesh; crisp, mild and tender; one of the most beautiful for the table or market.

10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

RADISH, WHITE BOX.

Perfectly round, smooth skin, pure white, free from any sharpness or bitterness. A remarkably quick grower, with small top. For forcing, it is in every way superior. 10 cts. 0z.; 20 cts. ½ lb.; 60 cts. lb.

SQUASH, CHICAGO WARTED HUBBARD.

A choice dark green and very warty selection from the well-known Hubbard, retaining all the good qualities of its parent. Very handsome, a grand keeper, and sells at sight. 10 cts. oz.; 25 cts. 1/4 lb.; 80 cts. lb.

SQUASH, GOLDEN HUBBARD.

An exceptionally attractive variety of the true Hubbard type. At maturity the color is red, and the flesh bright orange. The vine is productive and the fruit is fit for use earlier than the Hubbard. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

SQUASH, MAMMOTH CHILL.

Rich orange yellow; flesh thick and of good quality for making pies; grows to an enormous size; a valuable sort for feeding stock. 15 cts. oz.; 40 cts. 1/4 lb.

TOMATO, JUNE PINK.

Similar in habit and shape to the famous Earliana, differs only in color which is pink instead of red. A most desirable sort where pink tomatoes are in favor. \$1 00 1/4 lb.

TOMATO, EARLIANA.

An early sort of merit, said to be the earliest of all tomatoes; it is of uniform size and brilliant red color, of good quality, ripens thoroughly all over, the stem end coloring up perfectly. A good grower, and bearer. It is solid, with very few seed. 25 cts. oz.; 70 cts. 1/4 lb.

TOMATO, CHALK'S EARLY JEWEL.

A very fine sort, growing large, solid and smooth, color is of a bright red similar to the Stone. It is very early, a little behind the Earliana, but producing about three times as much fruit and the most uniform and smoothest grown; good market variety. 25 cts. oz.; 70 cts. 1/4 lb.

TOMATO, DWARF STONE.

Double the size of the Dwarf Champion and is the largest fruited upright growing variety. The color is deep red of a perfect thick, smooth shape, a good skin which is free from cracks at stem end, very solid, ripens evenly and of excellent quality. 25 cts. oz.; 70 cts. 1/4 lb.

TOMATO, EARLY MICHIGAN.

One of the best sorts for general market or family use; very smooth and regular in shape, uniform in size, color, and free from rot or cracking. Fruit medium size to large, perfect, smooth, solid, but without any core, deep, rich, red color, of excellent flavor. 20 cts. oz.; 60 cts. 1/4 lb.; \$2 00 lb.

TOMATO, TRUCKER'S FAVORITE.

A splendid variety for main use, producing an enormous crop of large, smooth, solid fruits. Color, deep purple, even sized, very deep through, few seeds and fine flavor. 25 cts. oz.; 75 cts. 1/4 lb.

TOMATO, MATCHLESS.

A large, bright red tomato, which has become very popular in the East. The fruit is large, very smooth and symmetrical, ripening well to stem, The flesh is a rich, bright color and of fine quality, though softer than that of either improved Trophy or Stone. 20 cts. 02.; 60 cts. 1/4 lb.; \$2 00 lb.

TOMATO, LIVINGSTON'S MAGNUS.

It is very distinct, having the color of Livingston's Beauty and Acme, but thicker, heavier and more solid than either. The form is uniformly perfect, large and attractive, very deep from blossom to stem end, and almost globe shaped. Fruit in clusters, ripening evenly and maturing quickly enough for early market. Flesh is firm and flavor most desirable. 20 cts. oz.; 60 cts. 1/4 lb.; \$2 00 lb.

TOMATO, QUEEN CITY.

The best tomato for market, remarkably prolific; flesh thick and solid. This we consider our finest large fruited purple sort. The plants are of strong growth and most productive. The tomatoes are of large size, deep through, very smooth and regular, free from cracks, solidly meaty with small seed cells and of exceptionally fine flavor. 25 cts. oz.; 75 cts. 1/4 lb.

Nasturtiums flower from the start to the finish of the season. Nothing makes a finer show in the garden.

SPECIALTIES.

We pay Postage on Flower and Garden Seeds, except where noted. Farm Seeds are sent by Express or Freight at Purchaser's Expense.

Emerald or

City Park

Lawn

Seed

We have made the subject of lawns a study for many years, and this mixture has been prepared and sold by us in all parts of the country, giving general satisfaction.

In making a lawn great care should be taken to use only the very best quality of lawn seed so as to produce a soft, velvety, evergreen sod, that will withstand cutting and heat of summer and the severe cold of winter. It is not made of annual grasses for a quick show, or of the chaffy, light weight seed sold by some seedsmen at cheap prices. Our mixture is not surpassed by any of the celebrated brands in the country. A pound of our mixture will sow about 300 square feet. Quantity of seed required to sow an acre (43,650 square feet.) For new lawns, not less than 4 bu.; for renovating old lawns, from 2 to 3 bu. First quality, per lb., 25 cts.; 5 lbs., \$1 00; 1 bu. (16 lbs.)

If to go by mail, add to the above prices 10 cts. per lb. for postage.

OUR LAWN GRASS MIXTURE FOR SHADY SITUATIONS

On nearly all lawns there are shaded, bare and unsightly spots on which the owners have difficulty in getting a stand of grass. For such places this mixture is adapted It is composed of dwarf-growing grasses which are found naturally growing in such places. Should the ground have become "sour," or drainage defective, it is apt to be covered with moss, If such is the case, apply "Grub Killer" to sweeten it, after first removing the moss, then rake thoroughly and sow the seed at the rate of not less than 4 bushels per acre. Per lb., 30 cts.; 4 lbs. \$1 00; bu. (16 lb.) \$3 50.

If to go by mail, add to the above prices 10 cents per lb.

for postage.

TERRACE MIXTURE.

A mixture of grasses with long interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rainstorms and covering with permanently green turf. Per lb., 30 cts.; 4 lbs., \$1 00; 1 bu. of 16 lbs., \$3 50. By mail 10 cts. per lb.

GOLF LINK MIXTURE.

For the grounds in general. Per lb., 20 cts.; 5 lbs., ts.; 1 bu. of 16 lbs., \$2 25. By mail, 10c. per lb. 80 cts.; I bu. of 16 lbs., \$2 25. extra.

PUTTING-GREEN MIXTURE.

A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve with trampling. Per lb., 30 cts.; 4 lbs. \$1 00; 1 bu. of 16 lbs., \$3 50. By mail, 10c. per lb. extra.

GRUB KILLER (AN INSECTICIDE.)

During the summer large patches of lawns die out without apparent cause, and upon investigation find that it is caused by White Grubs killing the grass. To remedy this evil, we offer "Grub Killer," a combination of chemicals which destroys the grub worms and ants and prevents the growth of moss, also sweetens sour ground. Apply broadcast at the rate of about 200 or 300 pounds per acre. Never use stable or vegetable manure, as same is filled with eggs of the grubs. 10 lbs., 40 cts.; 35 lbs., \$1 00; 50 lbs., \$1 25; 100 lbs., \$2 00.

CREEPING BENT GRASS (AGROSTIS STOLONIFERA.)

Particularly valuable for lawns that are to be used as croquet and tennis grounds, because it is benefitted more than hurt by trampling, and by its bright color adds to the beauty of the lawn. Lb., 25 cts.; 100 lbs., \$20 00.

RHODE ISLAND BENT GRASS (AGROSTIS CANINA.)

A valuable perennial for lawns and pasturage. Much like Red Top, though smaller. Thrives on light, dry soils as well as on rich, moist ones. For lawn purposes, if used lone, it should be sown at the rate of about forty pounds per acre; for pasture, if used alone, twenty-four pounds per acre. Lb., 25 cts.; 100 lbs., \$17 00.

CANADA FIELD PEAS.

Grown with Oats makes a fodder or hay which doubles the production of milk.

They should be sown in March or early April, two bushels of peas and two bushels of oats to the acre. The peas should be sown first and plowed under about 4 inches deep; the oats then sowed and harrowed in. They will be ready for cutting about the latter end of June when the oats are in milk and the pods formed on the peas. Prices variable, but always as low as the market will permit.

COW PEAS.

The Great Soil Renovator.

The Growing Crop Makes Poor Land Rich and Rich Land Better, at the Same Time Producing a Large Amount of Forage for Green or Dry Feed.

Cow Peas afford excellent midsummer pasturage, but the best way for using green is to cut and feed to stock. For hog pasture, turn in just as the peas are ripening; hogs will then eat both vines and peas, and will put on fat rapidly. For hay, cut when the last pods are formed, wilt, make into winrows, leave I or 2 days, then put in small cocks a week or ten days till thoroughly cured. Do not forget the Southern Cow Pea belongs to the Bean family and must not be planted until the ground is warm, in this latitude, about May 10th; from then to the last of June, or even later, if wanted for green feed. Plow the ground deep and harrow well, sow broadcast, 134 bushel per acre or drill 16 to 18 inches apart, 1 1/4 bushels per acre. They will grow well on almost all soils not too wet. Leading varieties. Write for prices.

I is the result of sowing under proper conditions our Emerald Lawn Seed.

FARM AND FIELD SEED SPECIALTIES.

AWNLESS BROME GRASS (BROMUS INERMIS.)

Will stand long droughts and produce heavy crops in dry sections where other grasses would perish. It has also proved one of the hardiest grasses. Will succeed in a wider range of temperature than any other grass. (10 lbs. per bu.) Lb., 20 cts.; 100 lbs., \$11 00.

BEARDLESS SPRING BARLEY.

The earliest Barley known, being fully a week or ten days earlier than any other barley. Height same as common barley, but better straw and will stand upon any land. A good yielder, six rowed. Ripens early, thus admitting of a second crop. Price, lb., 20 cts.; per bu., \$1 50.

SPELTZ (EMMER.)

Recently introduced into this country from Russia, where its value as a cereal has long been esteemed. very heavy crops of it have been reported from many sections of the country. It appears to do better than any other grain crop on poor, thin soil, and in the extremely dry seasons. It is eaten greedily by all kinds of stock, including poultry, and its feeding qualities are said to be excellent. A very fair flour is made from it. Sow broadcast same as oats, using about 75 lbs. to acre. Lb., 10 cts.; 10 lbs., 30 cts.; bu. of 40 lbs., \$1 00; 100 lbs., \$2 00.

TURKESTAN ALFALFA.

A variety of Alfalfa from Central Asia. It was first sent out by the Department of Agriculture about eight years ago, and has been widely tested throughout the United States with general satisfaction. Its great point of merit is its hardiness. In Turkestan, where the seed grows, the winters are very cold and the summers dry and hot, so it is able to stand the greatest extremes of cold and heat. This year we are able to furnish it at only a slight advance over the common Alfalfa. Sow 25 lbs. per acre. Lb., 25 cts.; 5 lbs., \$1 00; peck, \$2 75; per bu., \$9 50 to

BOKHARA CLOVER, OR HONEY PLANT. (Melilotus alba.)

A strong-growing perennial of value for green manuring, especially South, also largely grown for the excellent food it affords throughout its season for bees. Lb., 25 cts.; 10 lbs. and over, 20 cts. per lb.

JAPAN CLOVER.

(Lespedeza striata.)

A low -spreading perennial, much like white clover; of great value in the southern states for forage and green manuring. Lb., 35 cts.

HEMP SEED.

For Sowing

We receive many inquiries for hemp seed to be used to smother quack grass and Russian Thistle. When used for this purpose it should be sown thickly to produce a dense mass. It will grow quite tall and exclude light and air and for this reason is better to use than millet and buckwheat in order to kill off obnoxious weeds. When sown to produce fibre, use about a bushel of seed to the acre. Price, per 1b., 30 cts.; 10 lbs., at 16c.; 100 lbs., at 15c. lb.

TEOSINTE.

(Reana luxurians.)

This gigantic Grammea will furnish a continuous daily supply of most nutritious green food for horses and all kinds of cattle all through the summer, It also makes splendid dry fodder yielding enormously, and being more nutritious and better relished by all stock than corn fodder. In appearance it somewhat resembles Indian corn, but the leaves are much larger and broader, and the stalks contain sweeter sap. It stools out enormously after being cut. Sow in May or June, at the rate of three pounds per acre, in drills 4 feet apart. Lb., 75 cts.; by mail, postpaid; by freight or express, lb., 65 cts.; 5 lbs., and over at 60 cts. per pound.

TOHNSON GRASS

A popular grass in the Southern States. Valuable for fodder, growing 30 inches or more in height. It is a rapid growing perennial. On rich soil it may be cut three or four times in a season. Sow 20 to 25 lbs. per acre. Lb., 15c.; 10 lbs., \$1 00; 25 lbs., \$2 00.

JAPANESE BARNYARD MILLET.

It has proven an enormous yielder in all sections of the United States, producing hay and fodder to a height of 6 to 8 feet, and produces from 12 to 20 tons per acre, Cattle and horses eat it greedily and fatten rapidly. It is a remarkable stooler and should not be sown very thickly—10 to 12 pounds per acre broadcast being sufficient, In drills, 8 lbs, per acre is plenty. Lb., 10 cts.; 10 lbs., 75 cts.; 100 lbs., \$5 00.

GERMAN OR GOLDEN MILLET-TRUE SOUTHERN GROWN.

It has been fully established that German Millet grown in the Northern and Western States becomes de-teriorated, and soon resembles Fox Tail in quality and yield. This is due to the fact that German Millet is a native of a warm climate. Southern grown seed is worth double that of Northern or Western grown, if you want a good crop of hay. We are prepared at all times to fill orders at market prices.

FOR FOWLS

To get the best results must make them strong, healthy and prolific. They need shell-forming, feather-building, sinew-strengthening materials that will invigorate the system and develop their laying qualities. PEARL GRIT is a grit and shell-maker combined. Guaranteed to contain all essential properties of both grit and shell. It

SAVES HALF THE EXPENSE

and yet produces twice the result for the same cost. Chemical analysis shows Pearl Grit contains Calcium Carbonate (lime), Magnesium, Iron, Silicon, Sulphur, Aluminum Oxides and the other properties which are assimilated by the system during the grinding process and are just the elements needed to make fowls healthy and productive. Pearl Grit is clean—no waste, no dust—sharp and white. A wholesome, nutritious grit which meets every requirement of the practical poultryman. Its results will please you because they show in the egg basket.

In writing please state plainly whether you are a Market Gardener, Florist, Dealer in Seeds, etc.

ASPARAGUS, (Spargal, Ger.)

Sow in April in drills one inch deep and rows twelve inches apart, thin out to four inches in the row, when one year old transplant in rows three feet apart and two feet in the row. One ounce of seed will sow forty feet of row; 7000 roots will plant an acre.

Colossal—A large and rapid grower, 10 cts. oz.; 20 cts. 1/4 lb.; 50 cts. lb.

Palmetto—An improved early variety, vigorous growth and large stocks, 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. 1b.

Asparagus Roots.

Colossal —Two-year old roots, \$0.75 per 100; \$6.00 per 1000. Palmetto—Two-year old roots, \$1.00 per 100; \$7.00 per 1000.

BORECOLE or KALE, (Blaetter Kohl, Ger.)

This may be sown in May and transplanted in the same way as cabbage. They make very tender and delicious greens in the Fall. Very hardy, easily grown, they deserve more general cultivation.

Dwarf German Curled Kale.

One ounce to one hundred yards of row.

Dwarf German Kale—Very hardy, a standard variety, 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Siberian—Sometimes called "Sprouts" and "German Greens." The plant is low but spreading and very narry 10 cts. oz.; 20 cts. 10: 50 cts. 1b.

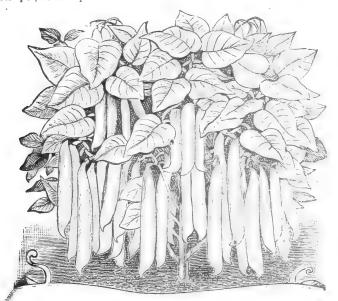

Persons purchasing Seeds at our store, or who wish to pay their own express charges, may deduct 10 cents per pound for all Seeds bought by the pound, IF QUOTED AT PREPAID RATES.

BEANS, (Bohne, Ger.) Dwarf or Bush Varieties.

The Bean is a tender plant and, therefore, should not be planted until danger from frost is past and then may be planted with success throughout the entire summer in rotation. Scw in open ground, from the end of April to the first of August, in rows two feet apart and thin from six to eight inches in the row. 1 quart to 100 feet of drill, 2 bushels to the acre.

Add 10 cents per pint, 15 cents per quart, if sent by mail.

Stringless Green Pod—This bean is the only stringless green pod dwarf bean in cultivation. It surpasses all others in crispiness, tenderness and flavor, and is the most prolific bean grown. The pods are 4½ to 5½ inches long, nearly round, slightly curved and of the best quality. They remain long in edible condition and are never stringy. 15 cts pt.; 25 cts. qt.

Henderson's Bush Lima-Grows in compact bush form 15 to 18 inches high. It is at least two weeks carlier than any of the clumbing Limas, 10 cts. ½ pt.; 15 cts. pt.; 25 cts. qt

climbing Limas, 10 cts. ½ pt.; 15 cts. pt.; 25 cts. qt

Early Long Yellow Six Weeks—A fine string bean, very prolific. 10 cts. pt.; 20 cts. qt.

Early Mohawk—First early productive and very hardy. 10cts.

Dt.; 20 cts. qt.

Horticultural Dwarf-Excellent quality as a shell bean either green or dry. 15 cts. pt.; 25 cts. qt.

Improved Round Pod Red Valentine—Ten days earlier than ordinary Valentine. 15 cts. pt.; 25 cts. qt.

Early Red Valentine—Round. green pods, early and tender, good for string or pickling. 10 cts. pt.; 20 cts. qt.

White Valentine—Early, tender and fine flavor. 15 cts. pt.; 25 cts. qt.

25 cts. qt.,

Golden Wax—Round, golden, waxy pods, early, prolific, stringless. The finest wax bean. 15 cts. pt. 95 cts. qt.

Tolden Wax—Round, golden, waxy pods, early, prolific, stringless. The finest wax bean. 15 cts. pt; 25 cts. qt.

Black Wax—Round, wax pods, early, stringless, solid and tender. 15 cts. pt.; 25 cts. qt.

White Wax—An excellent snap bean, also fine for shelling. 15 ts. pt.; 25 cts. pt.

Refugee—Hardy, productive, flesh thick and tender, one of the best for picking. 10 cts. pt.; 20 cts. qt.

Best of All—Early and of superior quality, round, green pods. 10 cts. pt.; 20 cts. qt.

White Marrow—A standard field variety excellent for shelling.

Mcts. pt.; 20 cts. qt.
White Marrow—A standard field variety, excellent for shelling.

Navy—An old standard variety, good for winter use. 10 cts. pt.; ts. qt.; \$1.00 peck.

White Fidney-An excellent shell bean, the best for Winter we. 40 cts. pt.; 20 cts. qt.; \$1.25 peck.

Red Kidney—Similar to the above, except in color. 10 cts. pt.;
20 cts. qt.; \$1.25 peck.

Turtle soup Black—Used in making mock turtle soup. 15 cts.

pt.; 25 cts. qt.; \$1 25 peck /Wardwell's Kidney Wax—Vines vigorous, hardy and produc-

Wardwell's Kidney Wax—Vines vigorous, hardy and productive. The pods are large, smooth and showy, tender and stringless, excellent winter shelled sort. 15 cts. pt.; 25 cts. qt.

Davis Kidney Wax—Pods are long, straight, oval. clear, waxy white color, often growing to a length of seven to eight inches; when fit for use are stringless and of fine flavor. 15 cts. pt.; 25 cts. qt.

Burpee's Bush Lima—This is a bush form of the well known large white Lima bean; is very fixed in its bush character, growing to a uniform height of about 20 inches. 15 cts. pt.; 25 cts. qt.

Yosemite Mammoth Wax Bush—Pods long and thick, of a rich golden color and absolutely stringless. 15 cts. pt; 25 cts. qt.

Currie's Rust-Proof Wax—Absolutely rust-proof. Pods are thick, with no approach whatever to stringiness. One of the earliest, very productive and of great value to market gardeners. 15 cts. pt; very productive and of great value to market gardeners. 15 cts. pt; 25 cts. qt.

BEANS, (Pole or Runners).

They are more tender and require rather more care in culture than the Bush Beans and should be sown t vo weeks later. They succeed best in sandy loam, which should be liberally enriched with manure. Form hills from three to four feet apart; plant five or six beans in each hill, about two inches deep, leaving a space in the center for the pole. Limas will not grow until the weather and ground are warm; if planted early they are apt to rot in the ground. One quart makes 100 to 200 hills, according to size of the beans; 10 to 12 quarts will plant an acre.

Add 10 cents per pint, 15 cents per quart, if sent by mail.

Large White Lima-A very popular variety, largely grown for 15 cts. pt.; 25 cts. qt.

Kentucky Wonder—A snap bean of wonderful growth, pods grow in clusters, are nearly a foot long, round and pulpy. This is the favorite corn bean in this section. 15 cts. pt.; 25 cts. qt.

Black Kentucky Wonder-Surpasses the old Kentucky Where in yield and quality. 15 cts. pt.; 30 cts. qt.

Extra Large Lima—The finest flavored of all shell beans. 15 cgs. pt.; 25 cts. qt.

King of the Garden Lima-A vigorous grower, beapfofusely, the beans are large and of rich flavor. 15 cts. pt.; 25 qt.

Dutch Case Knife-Early, productive, good for string or beans. 15 cts. pt.; 25 cts. qt.

Horticultural—(Wren's Egg or Speckled Cranberry)—Earland best shell bean, productive and tender. 15 cts. pt.; 25 cts. qt.

White Creaseback—A green pod bean, exceedingly productive pods five to six inches long, perfectly round, with a crease in the back, stringless, very fleshy, early, and of fine quality. 15 cts. pt; 25 cts. qt.

Southern Prolific-Long, round pods, produced in clusters, y and prolific. 10 cts. pt., 20 cts. qt.

Cut Short or Corn Hill-An old and popular variety, much d for planting among corn, excellent as a green shell or dry bean. 15 cts ot.; 25 cts. qt.

Scarlet Runner—Ornamental variety with bright scarlet flowers, also a good string bean. 20 cts. pt.; 40 cts. qt.

Lazy Wife's—The pods grow from four to six inches long, entirely stringless, and of a rich buttery lavor when cooked. The pods nemain green and retain their tender, rich flavor until ripe, excellent shell bean for winter use. 15 cts. pt.; 25 cts. qt.

BEET, (Runkel Rube, Ger.)

Sow as early in spring as the ground can be worked, in light wellmanured soil. in drills twelve inches apart, covering the seeds one inch deep and pressing the soil firmly over them. Thin out four inches apart for table beets, and eight to twelve inches for field beets, cultivate frequently. One ounce to 60 feet of drill, five to six pounds to the acre.

Table Varieties.

Edmand's Improved—Very fine turnip-shaped beet of round form, good size, dark red color and fine flavor. 10 cts. oz.; 20 cts. ¼ 1b.;

Farly Felipse — The best and most profitable very early variety of excellent form, dark color and tender quality. 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Egyptian — Extra early, flat turnip-chaped, deep red, tender and sweet. 10 cts. oz.;20 cts. ¼ lb.; 60 cts. lb.

Early Bassano—Flat, turnip-shaped, ght red. 10 cts. oz; 20 cts. 1/2 lb.; 60 cts. lb.

Dewing's Blood Turnip — Early, blood-red, good size, smooth and handsome. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Early Blood Turnip—Early, dark, well-flavored, extra. 10 cts. oz.; 20 cts. 4 lb.; 60 cts. lb.

Improved Long Blood - Excellent late sort, dark and smooth. 10 cts. oz.; 20 cts. ¼ 1b; 60 cts. 1b.

Swiss Chard—Cultivated for its leaves only, the middle ribs of which are cooked like asparagus. 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Crosby's Egyptian—An improved strain of the Egyptian Beet in great repute in Boston market. Much thicker than the original, quite as early better color and quality, and smoother. 10 cts. oz.; 25 cts 1/4 lb.; 70 cts. lb.

Norwood Blood Turnip-Of good marketable size, very uniorm, round and smooth. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

SUGAR BEETS AND MANGEL WURZEL.

For Stock Feeding.

rane's Improved Sugar Beet-Large, hardy and very productive, 10 cts. oz.; 15 cts. 1/4 lb.; 30 cts. lb.

Silesian Sugar Beet—Attains a large size and is highly valued for feeding, 10 cts. oz.; 15 cts. 1/4 lb.; 30 cts. lb.

Golden Tankard Mangel—Bright, yellow, large, handsome, heavy Cropper, splendid quality, 10 cts. oz.; 15 cts. 1/4 lb.; 30c lb.

Mommoth Long Red Mangel—Very large and productive, 10 cts. oz.; 15 cts. 1/2 lb.; 30 cts. lb.

(BROCCOLI, Spargel Kohl, Ger.)

Resembles cauliflower, but hardier. Sow in a hot bed in May, and transplant to a rich, mellow soil in early July. One cance to one hundred yards of row.

Early White Cape—Heads medium, compact, creamy white, 25 cts. oz.; 90 cts. 1/4 lb.

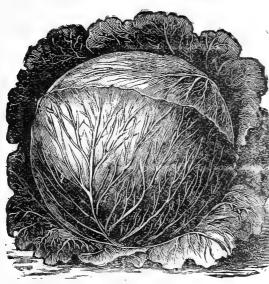

Early Purple Cape—Greenish-purple heads, hardy, good flavor. 25 cts. oz.; 90 cts. ½ lb.

BRUSSELS SPROUTS, (Sprossen Kohl Ger.)

This plant grows two or three feet high, and produces from the sides of the stalk numerous little sprouts one or two inches in diameter, resembling cabbage.

Dwarf Improved—A variety producing compact sprouts of excellent quality, 25 cts. oz.; 60 cts. ½ lb.; \$1.75 lb.

CABBAGE, (Weisskopf Kohl, Ger.)

This vegetable requires a deep, rich, mellow soil, high manuring and good culture, in order to obtain fine solid heads. For early use sow seeds of the early kinds in the hot bed, or in a box in the house, the last of January or early in February and transplant them in the open ground in April, in rows two feet apart and 18 inches between the plants in the row; or sow a bed of seed outside as soon as the soil can be worked, if you do not care for real early cabbage. These may be

These may be transplanted in about 4 weeks. For second early cabbage, sow in April and transplant in May. For late cabbage, sow in May and transplant in July, in rows three feet apart and two feet apart in the row. In transplanting cabbage or cauliflower, it is important that the plant is set down to the first leaf that the stem may not be injured in case of frost. One ounce of seed produces 1,500 to 2,000 plants and sows an area of about 40 square feet.

Louisville Early Drumhead—Originated in this market and is now the principal market variety and cannot be surpassed. Early heads of very large size and very solid, the best and surest heading for all purposes and will stand the entire summer without bursting. 20 cts. 02.; 50 cts. 1/4 lb.; \$1.75 lb.

Danish or Hollander—Small size, solid heads, one of the best for shipping. 20 cts. oz.; 50 cts. 11.75 lb.

Charleston Wakefield—Much larger than the OLD WAKEFIELD and only few days later. Favorite for Gardeners. 20 cts. oz.; 50 cts. 1/4 lb.; \$1.75 lb.

All Head Early—The earliest of all Cabbages, deep flat heads, remarkably solid in quality, tender, uniform in shape and size, compact growth. ALL HEAD is also valuable for a late Winter cabbage. 20 cts. oz.; 50 cts. ½ 1b.; \$1.75 lb.

Early Winningstadt—A very early variety, in size close to the Wakefield, heads large, decidedly conical, leaves bright green, heads solid and hard, 15 cts. oz.; 40 cts. ½ lb.; \$1.40 lb.

CABBAGE, Continued.

Surehead—A large variety producing large, round, flattened heads. It is all head and always sure to head. 20 cts. oz.; 50 cts. 1/4 lb.; \$1.75 lb.

Early Jersey Wakefield—The very best early variety, conical shape, solid, sure heading. 20 cts. oz.; 50 cts. 1/4 lb.; \$1 75 lb.

Henderson's Early Summer—The best large early cabbage, globular shape, a popular variety amongst market gardners. 20 oz.; 50 cts. ½ lb.; \$1.75 lb.

Early Dwarf York—Early and fine flavored. 15 cts. oz.; 50 cts. 1/2 lb.; \$1.50 lb.

Farly Large York—Early and much larger than the Dwarf York. 15 cts. oz.; 50 cts. 1/4 lb.; \$1.50 lb.

All Seasons—Early variety, heads large and solid. 20 cts. oz.; 50 cts. 11.75 lb.

Early Dwarf Flat Dutch—Heads solid, good flavor, an excellent variety. 15 cts. oz.; 50 cts. ¼ 1b.; \$1.50 lb.

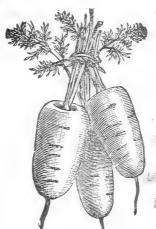

Premium Flat Dutch—(Select Stock.)—Heads large and very solid, they open white and crisp, are tender and well flavored; for the Winter market it has no equal. 15 cts. oz.; 40 cts. 11.; \$1.40 lb.

Fottler's Improved Brunswick—A rapid grower. has large, so'id heads, an excellent second early or late variety. 20 cts. oz.; 50 cts. 1/4 lb.; \$1.75 lb.

Large Late Drumhead—Large, solid and tender, an excellent Winter cabbage. 15 cts. oz.; 40 cts. 1/4 lb.; \$1.40 lb.

Red Dutch—The old standard variety for pickling. 20 cts. oz.; 60 cts. 15.; \$2.00 lb.

Improved Drumhead Savoy—The finest flavored Winter cabbage, large, round, solid heads. 20 cts. oz.; 50 cts.; ½ 1b. \$1.75 lb.

CARROT, (Moehren Ger)

The carrot grows best in a light sandy loam, well manured and cultivated. Sow as early as the ground can.be worked, in drills 10 inches apart for the small sorts and 14 inches apart for the larger kinds, thin out to 5 or 6 inches apart in the rows. One ounce of seed will sow 150 feet of drill, 4 lbs. to the acre.

Early French Forcing—The earliest variety grown, small, tender, fine quality. 10 cts. oz.; 25 cts. ¼ lb.; 85 cts. lb.

Early Scarlet Horn—An excelent table sort, fine color and flavor. 10 cts. oz.; 25 cts. ½ lb.; 75 cts. lb.

Half Long Stump Rooted—A fine grained table variety, of fair size and good color. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. 1b.

Danver's Half Long—The most desirable variety for the main crop, productive and keeps well. 10 cts. oz.; 25 cts ½ lb; 75 cts lb.

Thantenny—An early one-half long, stump-rooted variety of the test quanty. 10 cts. 02.; 20 cts. 1/2 lb.; 75 cts. 10.

intermediate—The roots grow regular and smooth, good size and very productive. 10 cts. oz.; 25 cts. ¼ 1b.; 75 cts. 1b.

Improved Long Orange—Large, heavy copper and excellent beeper. 10 cts. oz.; 20 cts. ¼ lb.; 60 cts. lb.

Long Red Altringham—A standard variety, desirable for field culture. 19 cts. oz; 20 cts. 1/2 lb.; 60 cts. 1/2 lb.

Large White Belgian—Large, long rooted variety, valuable for feeding stock. 10 cts. oz.; 20 cts. 1/2 lb.; 60 cts. lb.

Guerande or Oxheart—Extra fine quality, beautiful shape and very productive. Color, a rich orange. In length it is intermediate between the Danvers and Short Horn Carrot. 10 cts. oz.; 25 cts. 1/2 lb., 75 cts. lb.

Right Treatment Guaranteed. Give us a Trial.

CAULIFLOWER, (Blumenkohl, Ger.)

The culture of cauli-The culture of cauliflower is similar to cabbage. It delights in a rich, moist soil, and in dry seasons should be abundantly watered, especial-ly when heading. Sow seeds in the hot bed in January or February, and trans-plant the plants two or three inches apart in boxes, until such time as they are safe to be planted in the open ground. Set the plants 2 feet by 18 inches apart. When heading the the outside leaves loosely over the head to protect it from the sun.

One ounce gives

2000 plants.

Henderson's Early Snowball-A very early dwarf variety producing magnificent white heads of the finest quality. Its compact habit of growth renders it a peculiarly profitable variety to force under glass, and it does equally well for late planting. 20 cts. pkt.; 80 cts. 4 dz.; \$2.75 oz.

Learliest Dwarf Erfurt—This is the choicest, heads of the largest size, snowy whiteness, compact and beautiful form. 20 cts. pkt.; 80 cts. ¼ oz.; \$2.75 oz.

Early Paris—A good standard variety. 20 cts. ¼ oz.; 60 cts. oz.

Le Normand — A large late variety, producing well formed neads. 20 cts. ¼ oz.; 60 cts. oz.

CELERY, (Sellerie, Ger.)

Sow in a hot bed in March, and as soon as the plants are three inches high, transplant into a temporary bed in the open air, 4 inches apart. The plants may remain here until the first of July, and then remove to the trenches. The trenches ought to be a foot wide and deep remove to the trenches. remove to the trenches. The trenches ought to be a toot wide and deep and 5 feet apart. Spread a layer of well rotted manure in the bottom of the trench and dig in. Set the plants in the bottom of the trench 6 or 8 inches apart. As they grow, cultivate with the hoe, and gradually earth them up, and by the end of September they will be blanched sufficiently for use. Never earth up while the plants are wet, and be careful not to let the soil get into the heart of the plant. Water carefully in dry weather. One ounce will produce about 4000 plants.

Giant Pascal—A superior keeping sort. The stalks are very sarge, thick, solid, crisp and of a rich nutty flavor. It blanches easily and retains its freshness a long time. 15 cts. oz.; 50 cts. 1/4 lb.; \$1.50 lb.

15 cts. oz.; 50 cts. ¼ lb.; \$1.50 lb.

Golden Self-Blanching—
Close, compact perfectly solid, crisp, well-flavored and excellent keeper.
20 cts. oz.; 70 cts. ¼ lb.

Dwarf Golden Hears—I.s handsome color, medium size, fine flator and good keeping qualities render it the leading sort. 15 cts. oz.; 60 cts. ¼ lb; \$1.50 lb.

White Plume—A crisp, solid variety, with a pleasant, nutty flavor, almost self-blanching, the stocks requiring very little earthing up. Very ornamental for the table. 20 cts. oz.; 60 cts. ¼ lb.; \$1.75 lb. ornamental for the table. 20 cts. oz.; 60 cts. 12 lb.; \$1.75 lb.

Giant White Solid - Fine,

large size, tall and of stiff growth.

15 cts. oz.; 50 cts ¼ lb.; \$1.50 lb.

Boston Market—Dwarf-branching habit, solid, crisp, well-flavored. 15 cts. oz.; 50 cts. ¼ lb.; \$1.50 lb.

Paris Golden Yellow-Close. compact growth, golden yellow color. The stock is solid and crisp and a good keeper. 25 cts. oz.; 75 e 1/4 ib.

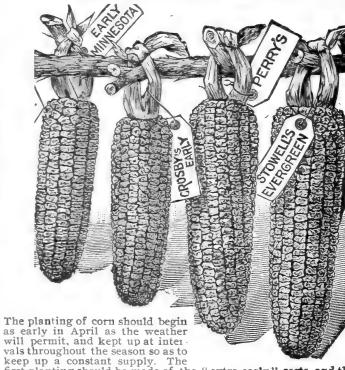

Celeraic or Turnip Rooted-The round, solid roots of this variety are used for flavoring. 15 cts. oz.; 40 cts. ½ 1b.; \$1.25 lb. Soup or Flavoring - 20 cts. lb.

CORN SALAD, (Ackersalat, Ger.)

Used as a salad. Sow as early in spring as the ground can be worked, in drills 12 inches apart, and cover lightly. For winter and spring use, sow in September, and winter over in cold frames.

Large Seeded - The standard variety. 10 cts. oz.; 20 cts. 1/2 lb.;

CORN, Sweet, (Mais, Ger.)

keep up a constant supply. The first planting should be made of the "extra early" sorts, and the last planting of the Improved Evergreen Sugar, and you will not fail to have a constant supply from the middle of June to the middle of October. One quart plants 200 to 300 hills, eight to ten quarts for an acre.

Add 10 cents per pint, 15 cents per quart, if sent by mail.

Country Gentleman—The ears are of good size and produced in great abundance, bearing three to four good ears to a stock. Cob very small, kernels are of pearly whiteness and delicious quality. 15 cts. pt.; 25 cts. qt.

First of All—Almost a week earlier than the Cory and Dwarfer, but of superior quality. 10 cts. pt.; 20 cts. qt.

Zig Zag Evergreen—This variety of Evergreen Sweet Corn is one of the best for private use, market gardeners and canners. It is of extra quality, very sweet and juicy in the green state. It ripens about same time as Stowell's Evergreen, and is superior to that well-known variety in sweetness and flavor. 15 cts. pt; 25 cts. qt.

Extra Early Cory—Second earliest variety in cultivation, producing good sized ears, fine quality and productive. 10 cts. pt.; 20 cts. qt.

Extra Early Adams-An old standard white corn, ready for table sixty days after germination, not a sweet corn. 10 cts. pt.; 10cts

Early Marblehead—Good early corn, medium size, prolific, week later than Cory. 10 cts. pt.; 20 cts. qt.

Early Minnesota—An early sort, of dwarf habit. 10 cts. pt.;

20 cts. qt.

(rosby's Early—One of the finest early sweet corns. productive and of excellent quality. 10 cts. pt.; 20 cts. qt.

Moore's (oncord—A second early variety, larger than Crosby's, excellent quality. 10 cts. pt.; 20 cts. qt.

White Cory—Much the same as the Red Cory, with the great advantage of a white cob. 10 cts. pt.; 20 cts. qt.

Egyptian—A late sort, ripening with Stowell's, largely used for canning. 10 cts. pt.; 20 cts. qt.

Perry's Hybrid—Early and of large size, good for market. 10 cts. pt.; 20 cts. qt.

Stowell's Improved Evergreen—The standard late sort. large ears, remaining long green. 15 cts. pt.; 25 cts. qt.

Mammath Sugar—Large, long, full ears, of excellent flavor. 15 cts. pt.; 25 cts. qt.

Adam's Early—Old standard sort. 10c pt.; 20c qt.

Black Mexican—Its merit is its sweetness. 10 cts pt; 20 cts.

Shaker's Early—The kernels are large, of pearly whiteness and delicious flavor. It is a great favorite with market gardeners, 10 cts. pt.; 20 cts. qt.;

SEED POP CORN.

White Pearl—Our common market variety. 10 cts. pt.; 20 cts. qt.
White Rice—A handsome variety, kernels long and pointed,
very prolific. 10 cts. pt.; 20 cts. qt.
Queen's Golden—The stalks grow six feet high, and the large
ears are produced in abundance, it pops perfectly white. 10c pt.; 20c qt.

WE always have in stock a large supply of old corn for popping, and are prepared to fill all orders at market prices.

Order Early.

Please order as soon after you get this Catalogue as possible, and then you will have your seeds at hand for planting when you want them, besides, if you want heavy seeds in large quantities, they can be sent by freight very cheaply.

SWEET CORN FOR FODDER.

There is nothing better for green feed, or curing for winter, than sweet corn. Cattle highly relish it, and when fed on it, keep in fine condition and give an abundance of milk. Also excellent for soiling. Sow thickly in drills or broadcast at the rate of two to three bushe's per acre. 50 cts. pk.

Subject to market change.

CUCUMBERS, (Gurken, Ger.)

As soon as the weather becomes settled and warm, plant in hills from four to six feet apart each way, with eight or ten seeds in each hill, cover half an inch deep, smoothing the hill off with the hoe. Keep the soil well stirred, and when the plants are out of danger of insects, leave three or four plants to the hill. For pickles, plant from the first of June to the first of

August. The fruit should be gathered when large enough whether required for use or not, as, if left to ripen on the vines, it destroys their productiveness. One ounce for 50 hills, 1 to 2 lbs. per acre.

Japanese Climbing—Is strong, vigorous and prolific, fruit 10 to 12 inches long, of a dark green color, delicious flavor. The vines are proof against mildew, never suffering from wet weather or insects. 15 cts. oz.; 40 cts. ½ 1b.

Cool and Crisp—This variety is inclined to taper off at the stem end, and is generally a little pointed at the other end also; is the most desirable shape for pickles. 10 cts. oz.; 25 cts. ½1b.; 75 cts. 1b.

Extra Early Russian—The earliest, hardy, prolific; excellent for small pickles. 10 cts. oz.; 25 cts. ½ 1b.; 75 cts. 1b.

Early Cluster—A short, prickly variety, bearing in clusters, very prolific. 10 cts. oz.; 20 cts. ½ 1b.; 65 cts. 1b.

Early Frame—Early, medium length, good for forcing. 10 cts. oz.; 20 cts. 11 lb.; 65 cts. 1b.

Improved White Spine—Medium length, crisp, well flavored, prolific. One of the most popular varieties grown. 10 cts. oz.; 25 cts. ½ lb.; 75 cts. lb.

Improved Long Green—Very popular, late variety, dark green, crisp, tender and well flavored. 10 cts. oz.; 25 cts. ¼ 1b.; 75 c. 1b.

Jersey Pickling—The best variety for pickling short straight, dark green, fine quality, great bearer. 10 cts. oz.; 25 cts. 1/4 lb.; 75 c. lb.

Green Prolific—One of the best for pickles, very uniform in growth, extremely productive and its flavor makes it desirable also for a table variety. 10 cts. oz.; 25 cts. ½ lb.; 75 cts. 1b.

Nichol's Medium Green—Early good for forcing or pickles; dark green, crisp, very prolific, straight and smooth, in length between the White Spine and Long Green, a decided acquisition. 10 cts. oz.; 25 cts. ¼ lb.; 75 cts. lb.

West India Gherkin—A small green pickling sort, used for pickling only. 15 cts. oz.; 50 cts. 1/4 lb.

CRESS OR PEPPER GRASS, (Kresse Ger.)

Well-known pungent salad, can be used alone or with lettuce. Requires to be sown thickly curling very slightly), at frequent intervals to keep up a succession, as it soon runs to seed.

Extra Double Curled—Fine pungent flavor, extensively used as a salad. 10 cts. oz.: 20 cts. ½ 1b.; 50 cts. lb.

Water Cress—Hardy acquatic perennial, growing readily on the banks of streams or ponds. 35 cts. oz. $\$1.00 \ \frac{1}{4} \ lb$.

ENDIVE, (Endivien, Ger.)

Sow in June or July, and transplant 8 or 10 inches apart in rows inches apart. Used as a salad, and requires to be blanched by tieing the leaves together at the top and placing boards to exclude the light. One ounce of seed to 150 feet of drill.

Green Curled—One of the best, dark green, finely curled, 15 cts. oz.; 45 cts. ½ 1b.. \$1.50 lb.

Moss Curled—Beautifully and densely curled, very ornamental. 15 cts. oz.; 45 cts. ½ lb.; \$1.50 lb.

Batavian Broad-Leaved—A large summer variety, very productive. 15 cts. oz.; 40 cts. ½ 1b.; \$1.25 lb.

EGG PLANT, (Eierpflanze, Ger.)

Sow seeds in a hot-bed in March in the same manner as tomatoes. As they are very susceptible to cold they should not be transplanted to the open ground until the weather is quite warm. Set the plants two feet apart each way. One ounce of seed will produce 1,000 plants.

Long Purple—Early, deep purple, oblong, hardy, productive, excellent, color variable. 20 cts. oz.: 75 cts. ½ 1b.;\$ 2.50 lb.

New York Improved.

KOHL RABI, (Kohl-Rabi, Ger.)

(TURNIP CABBAGE.)

When young and tender they are fine for table use, when matured they will keep well and are excellent for Winter feeding to stock. For early use sow in hot-bed, transplant and cultivate like early cabbage. For Winter use sow in the middle of June or first of July in rows 18 inches apart. One ounce of seed for 1,500 plants.

Early White Vienna—Flesh white and tender, 20 cts. oz.; 50 cts. 1/2 lb.

Early Purple Vienna—An excellent sort, later than the white. 20 cts. oz.; 50 cts. 1/2 lb.

LEEK, (Lauch, Ger.)

The Leek is generally considered superior to the Onion for soups, it is very hardy and easi'y cultivated. Sow in drills, a foot apart, in April, and transplant in July, in rows fifteen inches apart, and six inches from plant to plant. They should be set five inches deep, in rich, moist soil. One ounce will produce about 1,000 plants.

Large Rouen—One of the best, large and broad, of very mild, pleasant flavor. 15 cts. oz.; 40 cts. ½ lb.; \$1.25 lb.

American Flag—Hardy, useful sort for general use. 15 cts. oz.; 40 cts. ½ lb.; \$1.25 lb.

LETTUCE, (Lettich-Salat, Ger.)

It requires rich, moist soil, clean cultivating and plenty of water. This will give the quick growth on which depends its appearance, tenderness and flavor. Sow in a hot-bed in early Spring, as soon as the ground can be well worked, transplant in good rich ground, to rows 18 inches apart, and 8 to 10 inches in the rows. For a later supply, plant every two weeks from the middle of April until July, choosing varieties according to their heat resistance, and their tendency to remain in condition without seeding. One ounce of seed for 2,500 plants.

Cincinnati Market—The best forcing variety known and a favorite with all gardeners. Large pale green leaves, exceedingly crisp and tender and a shy seeder. 15 cts. oz.; 40 cts ½ ib.

Buttercup—New variety from Germany, tender and delicate flavor, early haid-heading, beautiful foliage, good either for summer or winter. 15 cts. oz.; 40 cts. ½ lb.; \$1.00 lb.

Early Curled Silesian—Very early and well-known sort, 15 cts. oz.; 30 cts. $\frac{15}{2}$ lb.; 80 cts. 1b.

Early Prize Head—Very large, crisp, tender, fine flavored, hardy, slow to seed. 15 cts. oz.; 30 cts. ½ lb.; 80 cts. lb.

Black Seeded Simpson—Like the ordinary Curled Simpson, it does not properly form a head, but a compact mass of leaves and differs in being light colored, the leaves being almost white, stands the summer heat excellently, and attains a size nearly double that of Curled Simpson. 15 cts. oz.; 30 cts. 1/4 lb.; 80 cts. lb.

Take care of this Catalogue, you will find it Valuable for Reference.

LETTUCE, Continued.

Deacon or Nonpariel—This is a fine market variety, crimped, curled and well-formed heads, withstands the heat of summer well. 15 cts. oz.; 35 cts. ¼ 1b.; \$1.00 lb.

California Cream Butier—This variety forms round, solid heads of good size, medium early and one of the best summer sorts. 15 cts. oz; 35 cts. ½ 1b.; \$1.00 lb.

Grand Rapids Forcing—It is of handsome appearance, a strong grower, and not apt to rot, and will keep from wilting longer while exposed for sale than any other sort. It matures two weeks earlier than Tennis Ball. 15 cts. oz.; 30 cts. 1/2 lb.; 90 cts. 1b.

Big Boston—This variety resembles the well-known Boston Market Lettuce, but produces heads almost double the size and matures a week later. 15 cts. oz.; 35 cts. ½ lb.; 90 cts 1b.

Early Curled or White Seeded Simpson—Does not head, but forms a compact, close mass of leaves, excellent for forcing. 15 cts. oz.; 30 cts. ½ 1b.; 80 cts. 1b.

Black Seeded Tennis Ball—Solid, dark green heads, very hardy, one of the best for out-door growing, crisp and tender. 15 cts. oz.; 30 cts. ¼ 1b.; 80 cts. 1b.

White Seeded Tennis Ball—A fine early sort, small heads, very hardy, valuable to grow in cold frames in winter. 15 cts. oz.; 30 cts. ½ 1b.; 80 cts. 1b.

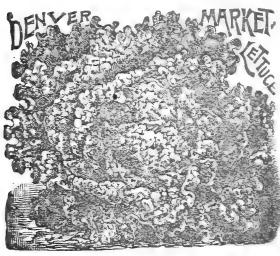

Boston Market—The best forcing head sort, very compact and is beautiful white and crisp. 15 cts. oz.; 35 cts. ½ 1b.; \$1.00 lb.

Improved Hanson—A splendid out-door lettuce, heads very close, solid and large, crisp, tender, sweet, green out-side, white within. 15 cts. oz.; 25 cts. 1/4 lb.; \$1.00 lb.

All the Year Round—Hardy, heads firm, medium, does not run to seed readily. 15 cts. oz.; 35 cts. ½ 1b.; \$1.00 lb.

Paris White Cos—The best of the Cos varieties, with long upright leaves, blanches readily when tied up. 15 cts. oz.; 30 cts. ¼ lb.; \$1.00 lb.

Philadelphia Butter or Early White Head—A thick-feaved, smooth lettuce, round dark green leaves, formed into a very solid, round head; stands a long time without running to seed. The inner leaves blanch a rich yellow; quality first class. 15 cts. oz.; 35 cts. ½ 1b.; \$1.00 lb.

Market—An early variety in head lettuce, either for forcing or open ground, it forms large solid heads of light green color and is very slow to go to seed. 15 cts. oz.; 30 cts. 1/4 lb.; \$1.00 lb.

Lettuce Mixture — All sorts. It can not fail to please.

Will give a succession of good lettuce throughout the season. A fine contrast to our Radish Mixture, when planted along side of it. 15 cts. 30 cts. 1/4 lb.; \$1.00 lb.

MELON, WATER, (Ger.) Wassermelone.

Water Melons require the same treatment and soil as described for the Musk Melon, but being more tender, should be given a southern exposure if possible. The hills should be eight feet apart. One ounce for 30 hills, about 5 lbs. for an acre.

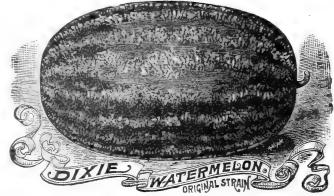

Triumph—Very prolific, early and of uniformly large size, and fine flavor. A good shipper. 10 cts. oz.; 23 cts, ½ 1b.; 60 cts. 1b.

Florida Favorite—Of medium size very prolific and unexcelled as a table variety. 10 cts. oz.; 25 cts. ½ 1b.; 70 cts, 1b.

Black Spanish—Round, dark green, flesh scarlet, with delicious sweet flavor. 10 cts. oz.; 20 1/4 lb.; 60 cts. lb.

Cuban Queen—A very fine variety, growing to great size, flesh bright red very solid and sweet. Enormously productive and an excellent keeper. 10 cts. oz.; 20 cts 1/4 lb.; 60 cts. lb.

Kolb's Gem—Light green, nearly round, averaging thirty to fifty pounds in weight, flesh bright red, rich and sweet, a good shipper. 10 cts, oz.; 20 cts. ½ 1b,; 50 cts. 1b.

Dixie—Of excellent merits, recommended as best shipping melon grown, being even larger, earlier and more productive than the Kolb Gem. 10 cts. 02.; 20 cts. 1/4 lb.; 60 cts. 1b.

Gypsy or True Georgia Rattlesnake—Very large, long and smooth and distinctly striped, flesh bright scarlet, a favorite shipping melon in the south. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Mammoth Ironclad—Of large size and great weight, flesh deep red and of delicious flavor. 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Mountain Sweet—Oblong, with dark green skin, flesh very solid and sweet. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Phinney's Early—Productive, early and finely flavored, red flesh. 10 cts, oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Peerless or Ice Cream—Of medium size, thin rind, light green, flesh scarlet solid to center and sweet. 10 cts. oz.; 20 cts. ¼ 1b.; 50 cts. 1b

Pride of Georgia—Dark green, oval, a good shipper. If well-grown attains a large size 10 cts. oz.; 25 cts. $\frac{1}{2}$ 1b.; 70 cts. 1b.

Seminole—It is of two distinct colors, gray and light green. Melons of both colors are often found on the same vine, and while of large size, it is very early, productive and of excellent quality. 10 cts. oz.; 25 cts. 1/4 lb; 70 cts. lb.

The Boss—A handsome, early, oblong variety, nearly the same thickness throughout, skin very dark, flesh deep scarlet, sugary and melting. 10 cts oz.; 20 cts. 1/4 1b.; 60 cts. 1b.

True Dark Icing—Very solid, rind very thin, highly prized as a shipper. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts lb.

Light Icing—Solid, always of good flavor, and thin light green rind. 10 cts. oz.; 20 cts. 1/4 1b; 60 cts. 1b.

Citron—A round, handsome fruit of small size, used for making sweet meats and preserves, seeds red, flesh white. 10 cts. oz.; 25 cts. ¼ 1b.; 70 cts. 1b.

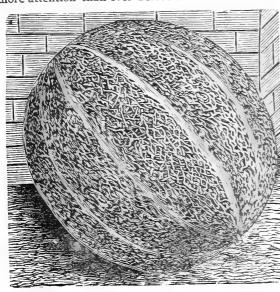

Sweetheart—Fruit large, oval, very heavy, uniformly mottled light and dark green, rind thin but firm, flesh bright red, firm, solid, but very tender, melting and sweet. 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

"PLANT-BLOOD"—A vitalizer and tonic for House Plants and Domestic Gardens. Price, 15 cents per pkg. (By mail, 25 cents package.)

MELON, MUSK, (Zucker Melone, Ger.)

A light rich soil is the most suitable for melons of all kinds. In very rich soil the hills should be six feet apart, in poor soil about five feet. Before planting the seed, mix about a peck of rotted manure with the soil in each hill. About the middle of May, plant the seeds half an inch deep, 6 or 8 in each hill. When the plants are well up, thin out, leaving 3 to a hill. One ounce of seed to 60 hills, 2 to 3 pounds for an

Rocky Ford—This wonderful and delicious Melon has attracted more attention than ever before known in the history of the melon

trade and will soon be foremost in demand. It can not be ex-celled in flavor and is one of the best for ship-No marping. ket gardener should be with-out it as it is sure to give satisfaction. As we only have a limited supply of this seed this season we would advise all to order early, so as not to be disappointed and thereby miss an opportunity of procuring a melon that recognizes no competition, but sells itself. It is sells itself. round and of

medium size, densely netted and thick meated. Will weigh on an average one to one and one-half pounds each, making it one of the most desirable of meions for restaurant and hotel purposes. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

Tip Top—A yellow-fleshed melon of the very best quality. They are sweet, juicy, of finest flavor, eatable to the very rind. 10 cts. oz.; 25 cts. ½ lb.; 80 cts. lb.

Delmonico-It is an oval melon of large size and deeply netted. The flesh is an orange color of the same fine quality as the Emerald Gem. 10 cts. oz.; 25 cts. 1/4 lb; 75 cts. lb.

Extra Early Hackensack-Fast becoming the most popular variety with market gardeners. Fruit large, round and netted. Flesh green and deliciously flavored. Very productive indeed and a good shipper. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts lb.

Emerald Gem-Of medium size, and a deep emerald green color. Flesh is a suffused salmon color, almost red; flavor is sweet and luscious. 15 cts. oz.; 40 cts. 1/4 lb.; \$1.00 lb.

Acme-The gardener's favorite. Slightly oblong and netted. The flesh is light green and thick, and has a rich, sweet flavor. It is a distinct variety, and one of the best for marketing. 10 cts. oz.; 25 cts. 1/4 1b.; 75 cts, 1b.

Large Hackensack—Early, round, netted, deeply ribbed, flesh green, very sweet and highly flavored. 10 c. oz.; 25 c. 1/2 1b.; 75c. 1b.

Jenny Lind-A small, very early variety, round, netted, flesh light green, excellent flavor. 10 cts. oz.; 25 cts. ½ 1b.; 75 cts. 1b.

Orange Christiana-Early, very productive, thick fleshed, melting, delicious 10 cts. oz.; 25 cts. 1/2 lb.; 75 cts. 1b.

Improved Cantaloupe-Flesh light green, very prolific. 10 cts. oz.; 25 cts. ¼ lb.; 75 cts. lb.

Casaba or Large Persian—Green flesh, oblong form and large size. 10 cts. oz.; 25 cts. ½ lb.; 75 cts. lb.

Montreal Market-Very large sort, nearly round, densely netted, deeply ribbed, green-fleshed, thick and of a delicious flavor, a great bearer and very popular. 15 cts. oz.; 30 cts. 1/2 lb.; \$1.00 lb.

Netted Gem-Very early, small, coarsely netted, green flesh, fine flavored. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. 1b.

MELON, MUSK, Continued.

Skillman's Netted-An early sort, round is hoval, flesh deep green, sweet, richly perfumed, delicious flavor. 10 cts oz.; 25 cts. ½ lb.; 75 cts. lb.

Green Nutmegearly, small, round, netted, green-fleshed sort, exceedingly sweet. 10 cts. oz.; 25 cts. ½ lb.; 75 cts. lb.

Miller's Creammost delicious melon. The flesh is of a rich salmon color, very sweet and melt-

ing in quality and very thick. It is a strong grower and productive. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

MUSTARD, (Senf, Ger.)

Sow thickly in drills, eight or ten inches apart, in rich, loamy soil, covering the seeds half an inch deep. When young, the leaves are used in salad, and in a more advanced stage, as greens, in the same way as spinach. Sowing may be made from April to July.

White—The best for salads, the seeds are also used for mixing with pickles and for preserving cider. 10 cts. oz.; 15 cts. 1/4 lb.; 30 cts. lb.

Brown—The mustard of commerce, more pungent than the White for this purpose. 10 cts oz.; 15 cts. 1/4 lb., 30 cts. lb.

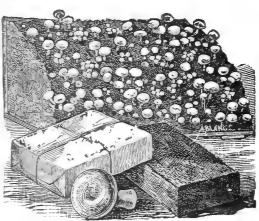

NASTURTIUM, (Nasturtium, Ger.)

The young seed-pods are much esteemed for capers; making ver delicate pickles. The plants are also highly ornamental, and an worthy of a place in the flower-garden for the sake of their brillian flowers.

Tall Mixed-10 cts. oz.; 25 cts. 1/2 1b.; 75 cts. 1b. Dwarf Mixed-1) cts. oz.; 25 cts. 1/4 lb.; 75 cts. 1b.

MUSHROOM SPAWN.

In preparing a mushroom bed, take three parts fresh stable manure, free from straw, and one part of good pasture soil. Mix thoroughly together and let it stand until the heat has sunk to about 90°. Make the bed from this mixture about four feet wide. eight inches deep, and any desired length. As soon as the temperature of the bed is

about 70° or 80°, the spawn may be inserted in pieces about the size of a walnut, and six inches apart each way. When the spawn is diffused through the whole bed, which will be in about ten days from planting, cover with two inches of fine loam and press down firmly. Over this place a layer of straw about four inches thick. Do not water unless the surface gets extremely dry, and then only with water at a temperature of 80°. When gathering the crop, twist them off at the roots and do not use a knife. Cover the hole with soil to keep insects away from the root. Mushrooms can be grown in a great variety of situations; under the benches in a green house, a dark room, cellar, stable or elsewhere. A pound of spawn will plant a space three feet by

English Mill Track Spawn-(in bricks). 15 cts. 1b. (mail 25 cts. 1b.) 10 lbs. \$1.00.

Treatise on Mushroom Culture-10 cts, each, postpaid. Falconer's Mushroom Culture-Cloth. \$1.00 postpaid.

ONION, (Zwiebeln, Ger.)

A light, loamy soil suits the onion best, and it may be grown for A light, loamy soil suits the onion best, and it may be grown for many consecutive years on the same ground. Previous to sowing, the ground should be well manured and deeply plowed. Harrow and rake the surface smooth and even. As early in spring as possible, sow the seed in drills 14 inches apart and half an inch deep, rolling firmly over the seed. A cultivator may be used between the drills, being careful not to throw too much over the crop. Weed the drills very carefully and never allow the weeds to get ahead of the young plants. One ounce t, 100 feet of drill, 4 to 5 pounas per acre.

Extra Early Red—A very early variety, of medium size. deepred, mild flavor, largely grown for sets. 15 cts oz.; 50 cts. 1/4 lb

Large Red Wethersfield—Excellent flavor, grows large. hardy and keeps well. 15 cts. oz; 50 cts. 1/4 lb.

Danver's Yellow Globe—Early, with very small neck, large size, fine quality and good keeper, the best for general crop 15 cts.

oz.; 50 cts. 1/4 le.

Large Yellow Dutch—Favorite old variety, large, round and

excellent keeper. 15 cts. oz.; 40 cts. ¼ lb.

Prize Taker—The skin is a bright straw color, flesh white, very thick and of mild flavor. It is to-day one of the largest, handsomest and most profitable variety grown. 15 cts. oz; 50 cts. ¼ lb.

White Portugal or Silver Skin—Early, mild flavored and

excellent for first crop. 20 cts. oz.; 60 cts. 1/4 lb.

White Globe—This variety yields abundantly, produces handsome, globe-shaped bulbs, the flesh is firm, fine grained of mild flavor.
20 cts. oz; 70 cts. 1/4 lb

White Queen-Beautiful white skin, the earliest variety, most

excellent flavor and a good keeper. 20 cts. oz.; 60 cts. 1/4 lb.

Mammoth Silver King—One of the largest onions in cultivation, early, shape flat, but very thick, skin a silvery white, flesh mild, delicate and of snowy whiteness. a handsome and very popular variety. 20 cts. oz.; 60 cts. 1b.

ONION SETS.

Add 5 cents per pint and 10 cents per quart for Postage.

These are valuable for early use and where onions from seed can not be raised the first year. Plant near the surface in drills 12 inches apart and 4 inches in the rows.

Yellow Bottom Sets, Red Bottom Sets. White Bottom Sets, Top Sets. White Multiplier Sets, Price per peck and bushel on applica-

OKRA or GUMBO, (Ocker, Ger.)

The young, green seed-pods of this plant, are used in soups, or stewed and served like asparagus. The young pods can also be dried for winter use.

Improved Dwarf Green—This variety has long, slender pods, very early, productive, and only grows 14 inches high. 10 cts. oz.; 20 cts. 1/2 lb.; 60 cts. 1b.

White Velvet—The pods of this variety are round and smooth,

and much larger than the common varieties, and are produced in great abundance. 10 cts. oz.; 20 cts. 1/2 lb.; 60 cts. lb.

PARSLEY, (Petersilie, Ger.)

Parsley succeeds best in a rich, mellow soil. As the seeds germinate very slowly, three or four weeks elapsing sometimes before it makes its appearance, it should be sown early in spring. Sow thickly in rows a foot apart and half an inch deep. For winter use, protect in a frame or light cellar. One ounce will sow 150 feet of drill.

Double Curled -A fine dwarf variety,

bounded curled—A fine dwarf variety, beautifully curled, excellent for garnishing. 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Champion Moss Curled—A very select stock, beautifully crimped and curled, 10 cts. oz.; 20 cts. ½ 1b.; 60 cts. 1b.

Plain Leaved—Very strong flavor. 10 cts. oz.; 20 cts. ½ 1b.; 60 1b.

PARSNIP, (Pastinake, Ger.)

Sow as early in the spring as the weather will admit, in drills 15 inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug up as required. One ounce will sow 200 feet of drill, five pounds to an acre.

Long Sugar-The best for general use. 10

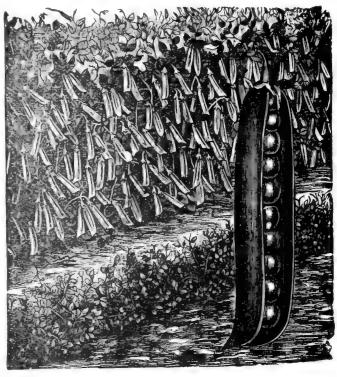

cts. oz.; 20 cts. ¼ 1b.; 50 cts. 1b. **Hollow Crown** — Good old sort. 10 cts.
oz.; 20 cts. ¼ 1b.; 50 cts. 1b.

PEAS, (Erbsen, Ger.)

Peas come earlier to maturity in light, rich soil. For general crop a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. Plant the early varieties as soon as the ground can be worked, the others in succession from April to June. For private use they are generally sown in double or single rows, in drills, about two feet apart and three inches deep, for the dwarf varieties, three to four feet apart and four inches deep for the taller varieties. Those growing over two and a half feet in height should be bushed. One quart to 80 feet of drill, 1½ bushel for one acre.

Add 10 cts. per pint, 15 cts. per quart extra, if sent by mail.

Wrinkled Varieties Marked *.

First and Best—My selected stock of this fine, standard variety, is quite unsurpassed for earliness, productiveness, excellent flavor and size of pod, two feet high. 15 cts. pt.; 25 cts. qt.

Alaska—One of the earliest and most productive of the very early peas, distinct, two feet. 10 cts pt.; 20 cts. qt.

Mand S—Have a limited supply from original stock. 16 cts. pt; 25 cts. qt.

Philadelphia Extra Early—The well-know early variety, height two and a half feet. 10 cts. pt.; 20 cts. qt.
Improved Daniel O'Rourke—Very early, fine cropper, long pods, exquisite flavor, height two and a half feet. 10 cts. pt.; 20 cts.

Early Kent or May-A favorite first early variety. 10 cts. pt.;

Tom Thumb-An old and well-known dwarf sort, height ten

*American Wonder—A remarkably fine, dwarf wrinkled variety, extra early, requires no bushing, very sweet flavor, height about one foot. 15 cts. pt.; 25 cts. qt.

* McLean's Little Gem—An early green marrow of excellent

quality and an abundant bearer, height one and one-half foot. 15 cts. pt.; 25 cts qt.

* Advancer—A finely flavored, green wrinkled marrow, very pro-

* Advancer—A finely flavored, green wrinkled marrow, very productive and uniform we can not recommend this sort too highly, height two and a quarter feet. 15 cts. pt.; 25 cts. qt.

* Improved Champion of England—One of the best peas grown, unsurpassed in flavor, sweetness and general excellence. Our stock is maintained pure by careful selection, height five feet. 10 cts.

pt.; 20 cts. qt.

*Stratagem—The best late marrow pea grown, immeuse pods, splendid flavor, vigorous growth, very popular, height two and a half feet. 15 cts. pt.; 25 cts. qt.

*Carter's Telephone—Green wrinkled, peculiar light shade of green, productive, pods unusually large size, elegant shape, slightly curved, well filled with peas of large size, good quality, height three

and a half feet. 15 cts. pt.; 25 cts. qt.

Dwarf Blue Imperial—A great bearer and fine flavored, height three feet. 10 cts. pt.; 20 cts. qt.

*Yorkshire Hero—A splendid main crop pea, dwarf and branching, very prolific and delicious flavor, height three feet. 15 cts.

pt.; 25 cts. qt.

Black Eye Marrow—A good late sort for market, hardy, productive, excellent either as a field or table pea, height three feet. 10 cts. pt.; 15 cts. qt.

PEAS, Continued,

- * Eclipse—This is an extra early green winkled pea, the pods resembling the American Wonder in size and shape of the pod. It is earlier than the Alaska and the most productive of any green wrinkled pea. We unhesitatingly recommend it as the best early pea for the private garden. Height of vine 2 ft. 15 cts. pt.; 25 cts. qt.
- * Nott's Excelsior—Remarkably hardy and productive one of the earliest of wrinkled peas. It is unsurpassed in size and quality. 15 cts. pt 25 cts. qt.

Large White Marrow—One of the best late sorts, very productive, good flavor, height five feet 10 cts. pt.; 15 cts. qt.

*B!iss' Everbearing—Height, 18 inches, a continuous bearing wrinkled variety. The best for late planting. 15 cts. pt.; 25 cts. qt.

Blue Peter—A larger, better and earlier form of Tom Thumb, having blue seed. Very dwarf and early; a good bearer, and of excellent quality. 15 cts. pt.; 25 cts. qt.

* Carter's Premium Gem—An improved Little Gem. Dwarf, prolific, fine flavored, large pods, excellent, either for market or home use, height one and one-half feet. 15 cts. pt.; 25 cts. qt.

Melting Sugar—An edible podded variety growing from four to five feet high; pods very large, four to five inches long, and one or more broad, each usually containing from five to eight large peas. Being edible podded, it should be used the same way as a wax bean; very sweet and tender. 20 cts. pt; 35 cts. qt.

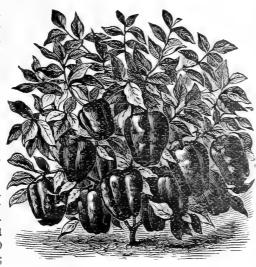

*Pride of the Market—A strong growing variety, growing from 18 to 24 inches high, and is very productive. The pods are unusually large and the peas, when cooked, are of very superior quality. 15 cts. pt.; 25 cts. qt.

Canada Field—Mostly used as a field crop. 10 cts. qt.; 50 cts. pk, Subject to market change.

PEPPER, (Pfeffer, Ger.)

A light, warm loam is the best soil for peppers. Sow in March or April, in a hot-bed, and transplant when the weather is warm. They are quite tender, and will not bear frost. Set the plants fifteen inches apart, and two feet between the rows. One ounce for 1,500 plants.

Golden Dawn—A new variety, very handsome, golden yellow, sweet, mild, and very productive. 20 cts. oz.; 60 cts. 1/4 lb.; \$2.00 lb.

Celestial—Another handsome, new pepper, when fully ripe vivid scarlet, very productive, sharp clear flavor, excellent. 20 cts. oz.; 60 cts. 1/2 lb.;

Red Chili—Small, cone-shaped, bright red, fiery. 25 cts. oz.; 75 cts. $\frac{1}{2}$ lb.

Large Bell or Bull Nose—Large, early bright red, mild. 20 cts. oz.; 60 cts. 1/2 1b.; \$2.00 1b.

Sweet Mountain—A large early sort, mild and excellent, bright red. 25 cts. oz.; 75 cts. 1/4 lb.

Long Red Cayenne-Long bright red, fiery. 20 cts. oz.; 60 cts. 1b.; \$2.00 lb.

Ruby King—Beautiful, bright red, large fruit and mild, the best epper for mangoes in cultivation. 25 cts. oz.; 75 cts. 1/4 lb.; \$2.25 lb.

PUMPKIN, (Kuerbis, Ger.)

These are usually grown for stock feed, and are generally scattered at intervals in the hills while planting sweet corn. For making pumpkin pies the squashes are very much superior. One ounce to fifteen hills 3 to 4 pounds to an acre.

Large Cheese—Very superior, productive, fine grained, good flavor, cheese shaped. 10 cts. oz.; 20 cts 1/2 lb.; 50 cts. lb.

Cashaw—One of the largest and best, yellow, solid, good keeper, 10 cts. oz.; 25 cts. $\frac{1}{2}$ lb.; 75 cts. lb.

Large Tours—Grows enormously large, round, flattened, skin salmon, flesh yellow, fine grained, good quality. 15 cts. oz.; 35 cts. 1/4

Tennesse Sweet Potato—An excellent variety for pies, pear shaped, of medium size, flesh and skiu creamy white, fine grained, very sweet and deheious. 10 cts. oz.; 25 cts. ½ 1b.; 75 cts. 1b.

Kentucky Field—Good for cooking purposes or for feeding stock. 10 cts. vz.; 20 cts. ¼ 10.; 40 cts. 1b.

Connecticut Field -The common yellow pumpkin. 10 cts. oz.; 20 cts. ½ lb.; 40 cts lb.

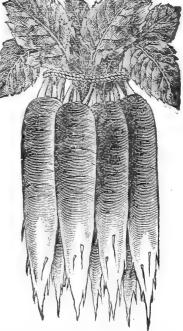

Mammoth—This is the Big Show Pumpkin, catalogued under the various aliases, "King of the Mammoths," "Jumbo," "True Potiron," "\$50 Prize," etc. Specimens have weighed over 200 pounds. Skin, salmon color; flesh, bright yellow. Keeps a long time. 15 cts. oz.; 35 cts. ½ 1b. \$1.25 lb.

RADISH, (Radies, Ger.)

All the varieties thrive best in a light, sandy loam. For early use sow in the hot bed in February, giving plenty of ventilation, or outside in drills as soon as the soil can be got in order, covering the seed about ha!f an inch deep. Sow every two weeks, from March to September, for a succession, they must grow rapidly to be crisp, mild and tender. One ounce sows too feet of drill, 8 to 10 pounds to an acre.

Cincinnati Market—Grows six to seven inches in length, straight, and smooth, flesh is exceedingly tender, crisp and delicious; never becomes hollow and pithy. Skin is very thin and has an attractive, glossy appearance. Undoubtedly the finest long red Radish for either the market or house gardener. 10 cts. oz.; 25 cts. ½ 1b.; 70 cts. 1b.

Extra Early Carmine One of the handsomest and best of all the extra early radishes, of a rich, dark carmine color. The foliage is short, stiff and extremely small. In 20 to 22 days the crisp, tender little radishes are ready to pull. 10 cts. oz.; 25 cts. ½ 1b.; 60 cts. 1b.

Early Scarlet Turnip—The standard early, short, quick-growing variety. 10 cts oz; 20 cts. 1/2 lb.; 50 cts. 1b.

Early White Turnip-Of mild flavor, excellent for summer use. 10 cts. oz.; 20 cts. 1/2 lb; 50 cts. lb.

Early Long Scarlet Short Top-The standard variety for market and private use. 10 cts. oz.; 20 cts. 1/2 1b.; 50 cts. 1b.

French Breakfast—Form oval, scarlet, tipped with white, quick growing, and excellent flavor. 10 cts. oz.; 20 cts. ½ 1b.; 50 cts. 1b.

Golden Globe—This variety is very popular. It is of a quick growth, tender and brittle, of perfect globe shape. 10 cts. oz.; 25 cts. ¼ 1b.; 60 cts. 1b.

Chartier—Grows to a large size without losing its tenderness; scar et tipped with white, long crisp and tender. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Giant White Stuttgart - A quick-growing early sort, largest size, flesh and skin pure white, fine quality; firm and brittle, never gets pithy. 10 cts. oz; 20 cts. 1/4 lb.; 50 cts. 1b.

White Strasburg—A large, handsome, white variety, of excelent quality; early. 10 cts. oz.; 20 cts. 1/2 lb.; 60 cts. lb.

Long White Naples—A handsome, long, clean, white radish, crisp and tender, good for summer use. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. pound.

Poor Seed invariably causes loss and disappointment. The cheapest is never the best. The best is always the cheapest.

RADISH, Continued.

Brightest Long Scarlet—It is very early, maturing in 20 to 25 days, the flesh crisp and tender, excellent for home garden and particularly desirable for the market, as it sells quickly because of its fine color and form. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. lb.

Wood's Early Frame—Long scarlet radish, excellent for forcing. 10 cts. oz.; 20 cts. 1/4 lb.; 60 cts. lb.

Golden Dresden—We recommend it alike for family garden and for market as one of the most valuable and quick growing radishes. Tops very scant and admit of close planting. It is perfectly round, smooth and very attractive, light golden brown skin. The flesh is crisp, white, juicy and of finest flavor. Market gardeners can grow this new radish in the garden or force it, and depend upon a remarkable perfect, early, uniform crop. 10 cts. oz; 25 cts. ½ lb.; 75 cts. lb.

Chinese Rose Winter—Popular winter sort, medium size, bright rose, excellent. 10c. oz.; 20c. 1/4 lb.; 60c lb.

Round Black Spanish—A winter variety, large, mild and firm, skin black, flesh white. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Long Black Spanish—Same as above, except in shape. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

California Mammoth White—Grown extensively by Chinese in California, 8 to 12 inches long, 2 to 3 inches in diameter, white, solid, good flavor. 10 cts. oz.; 20 cts. ½ lb.; 60 cts. lb.

Radish Mixture, all sorts—This is especially adapted to the wants of those having only a small garden, as it contains all of the leading varieties, and will give a succession of fine radishes. Try a package. It will please you. 10 cts. oz.; 20 cts. ½ 1b.; 50 cts. 1b.

RHUBARB, (Rhabarber, Ger.)

A deep, rich soil is best for rhubarb, sow early in drills 18 inches apart and 1 inch deep, the spring following transplant, allowing each plant at least 2 feet square. One ounce for about 800 plants.

Linnæns-Extra large, tender. 15 cts. oz.; 50 cts. 1/2 lb.; \$1.50 lb.

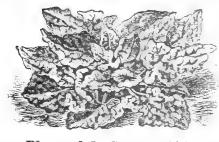

SALSIFY, (Hafer-wurzel, Ger.)

Commonly called Vegetable Oyster. Used stewed, boiled or fried. When cooked has an oyster flavor. Sow early in drills 15 inches apart, cover the seed with fine soil, an inch and a half deep. One ounce will sow 50 feet, seven pounds to an acre.

Long White French—The standard variety. 10 cts. oz.; 25 cts. $\frac{1}{2}$ 1b.; 90 cts. 1b.

Mammoth Sandwich Island—This variety is of enormous size, twice as large as the ordinary sort, very tender and delicious. 15 cts. oz.; 35 cts. ¼ 1b.; \$1.25 lb.

SPINACH, (Spinat, Ger.)

This is the best developed and most tender and succulent when grown in very rich soil. For summer use sow early in spring in drills 15 inches apart, and make sowings every two weeks. For spring use sow in September, and cover lightly in November with light litter. One ounce to 100 feet of dril. Ten to twelve pounds per acre.

Bloomsdale Savoy—Thick, succulent leaves, very productive and hardy. 15 cts. 1/4 lb.; 35 cts. 1b.

Round Thick Leaf-One of the best for early spring or fall sowing, leaves large, thick and succulent. 15 cts. 1/4 lb.; 35 cts. 1b.

Long Standing Thick Leaved—Does not run to seed so readily as the other. 15 cts. ½ 1b.; 35 cts. 1b.

Prickly-Vigorous and hardy, good for winter. 15c 1/2 lb.; 35c lb.

Special Prices given on Spinach in quantity.

SQUASH, (Kuerbis, Ger.)

The squash is of tropical origin, and only succeeds well in a warm temperature, consequently the seeds should not be planted out until the ground is warm and mellow. The hills should be about six feet apart for winter varieties, and four feet for summer sorts. Plant a dozen seeds in each hill. Thin out the weakest vines, and when all danger from bugs is past, leave three vigorous vines to the hill. Cultivate well, and keep the ground clear of weeds. One ounce of seed to about 40 hills, four to six pounds to the acre.

Early White Bush or Patty Pan—A scolloped sort, best for early use. 10 cts. oz; 25 cts. ½ lb, 80 cts. 1b.

Summer Crook-Neck—The old standard sort; very early and productive. 10 cts. oz.; 25 cts. 1/2 lb.; 80 cts. 1b.

Essex Hybrid—Productive, good keeper, and one of the best flavored. 10 cts. oz.; 25 cts. ¼ 1b; 80 cts. 1b.

American Turban— Excellent quality, flesh thick and sweet, surerior fall sort. 10 cts. oz; 25 cts. 1/4 lb.; 80 cts. lb.

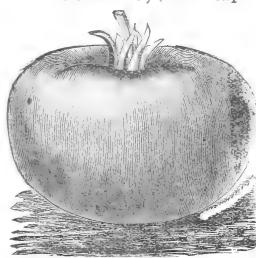

True Hubbard—A general favorite, hard, dark green shell, meat thick, dry and finely flavored. 1 c s oz.; 25 cts. 1/2 lb.; 75 cts lb

Boston Marrow—Good keeper and of excellent flavor, soell orange, quite hard, several weeks earlier than the Hubbard. 10c. oz.; 25c. ½ lb.; 80c. lb.

Marblehead—Color light blue, splendid keeper, for sweetness, dryness and fine flavor quite unsurpassed. 10c. oz.; 25c. ½ lb.; 80c. lb.

Vegetable Marrow-A favorite English sort. The fruit is from nine to eighteen inches in length, and four to six inches in diameter. Skin a greenish yellow; flesh, white, soft and of rich flavor. Plant 8 feet apart. 10 cts. oz.; 25 cts. 1/4 lb.; 75 cts. lb.

TOMATO, (Liebesapfel, Ger.)

To obtain fruit very early, sow in the hotbed in March. In about 5 weeks plants should be transplanted to another hot-bed. setting them 4 or 5 inches apart. Here they should remain, having all the air possible, until about the middle of May, when they may be put out in the ground. If not too early or too cold, a cold frame will answer for the first transplanting. Pinching off a portion

of the side branches, and stopping others just beyond where the fruit is formed, hastens the ripening. Very good plants can be grown in boxes in the house. One ounce of seed will produce about 1500 plants.

Buckeye State—The tomatoes are borne in immense clusters of four to eight fruits, and occasionally ten large fruits have been found on a single cluster. In solidity and meatiness it has no equal, while in luscious qualities none surpass it. The color is much the same as Beauty, but a darker and richer shade, and this, together with its very large size and clear-cut outlines, makes it very showy and striking when displayed for sale. 25 cts. oz.; 70 cts. ¼ 1b.; \$2.50 lb.

Ponderosa—This monster tomato is all solid meat, being uniformly large, smooth, of dark rich crimson color, and a delicious subacid flavor. 25 cts. oz.; 90 cts. 1/4 lb.

Matchless—A large, bright red tomato, which has become very popular in the east. The fruit is large, very smooth and symmetrical, ripening well to stem. 25 cts. oz.; 80 cts. 1/4 lb.; \$2.00 lb.

Stone—An excellent shipping variety, quality the very best, fine for canning, fruit large, very smooth, and of bright scarlet color, flesh firm and solid. 20 cts. oz.; 60 cts. 1/4 lb.; \$2.00 lb.

ABOVE PRICES INCLUDE POSTAGE. Persons purchasing Seeds at our counters, or who wish to pay their own express charges, may deduct 10 cents per pound from all Seed bought by the pound, if quoted at prepaid rates.

TOMATO, Continued.

Trucker's Favorite—It begins to ripen quite early and continues to bear profusely until frost; nothing exceeds it in productiveness; the fruit is large, solid, and smooth, beautiful reddish purple; presents a remarkably fine appearance; a good shipper. In fact, it will be found one of the most profitable tomatoes for main crop for the market garguer. The Crop of the first of the state of the second stat uener. 25 cts. oz.; 75 cts. 1/4 lb.

Imperial—A sort introduced as very early and superior in size and quality to the Beauty. We have a stock of it carefully grown from seed secured from the originators, and while we find it a large, hand-some purple tomato, it has not proved earlier or superior to our carefully tried and selected s.rain of Beauty, which it resembles. 20 cts. oz.; 80 cts. 1/2 1b.; \$2.00 1b.

Dwarf Champion—This fine sort is quite distinct and very early. The foliage is dark and the stem stiff, so that the plants stand up well. even when loaded with fruit. The fruit is smooth, solid and excellent. 25 cts. oz.; 75 cts. 1/4 lb.

Atlantic Prize—Vine medium size, with few leaves, very hardy, bearing the fruit low down on the stem and in enormous clusters, which ripen all together. Those whose trade demands that they have a large, smooth, good flavored, very early red fruit, will find this variety to be just what they want. 25 cts. oz.; 60 cts. 1/2 lb.; \$2 00 lb.

Golden Queen—The best yellow, medium early, smooth, round, very productive, excellent quality. 20 cts. oz.; 60 cts. ½ 1b.; \$2.00 lb.

Livingston's Beauty—Color very glossy crimson, grows in clusters of four or five fruits, large and solid. 25 cts. oz.; 60 cts. ½ lb.; \$2.00 lb.

Livingston's Favorite—Productive, good flavor, few seeds, flesh solid, smooth and handsome. 25 cts. oz; 60 cts. ¼ lb.; \$2.00 lb.

Livington's Perfection — Early, large, smooth and solid, blood red color. 20 cts. oz.; 60 cts. ¼ lb; \$2.00 lb.

Early Acme-One of the earliest. The fruit is of medium size, perfectly smooth and regular in shape color quite distinct, being a dark red, with a purplish tinge. 25 cts. oz.; 60 cts. 1/2 lb.; \$2.00 lb.

Mikado—Very large size, solid, free from core, and almost seedless round and even, bright red, smooth skin, excellent quality and a fine yielder. 25 cts. oz.; 70 cts. ½ lb.; \$2.50 lb.

Trophy-Fruit very large, solid and heavy, excellent for main crop 25 cts. oz.; 60 cts. 1/4 lb.; \$2.00 lb.

Cincinnati Purple-A valuable variety, especially adapted for canning and shipping. It is very large, color a dark purplish red, very productive and of rich flavor. 25 cts. oz.; 60 cts. 1/2 lb.; \$2.00 lb.

Yellow Pear Shape-Fine for preserves or pickling. 25 cts oz.; 75 cts. ¼ lb.; \$2.50 lb.

Cherry, Red and Yellow-For preserves and pickling. 25 cts. oz.; 75 cts. 1/4 lb.; \$2.50 lb.

TOBACCO, (Taback, Ger.)

The seed should be sown as early as possible after the danger of frost is over. Cover very lightly, and when the plants are about \sin inches high, transplant in rows \sin feet apart each way.

Connecticut Seed Leaf-A long Jeaf, fine texture. 25cts. oz.; 75 cts. ¼ lb.; \$2.75 lb.

Havana-Pure Cuban grown seed. 30 cts. oz.; 90 cts. 1/2 1b.; \$3.25 1b. White Burley—A variety largely grown for manufacture of fine cut and plug. 25 cts. oz.; 85 cts. ½ lb; \$3.00 lb.

TURNIP, (Rueben, Ger.)

Turnips for early use may be sown as soon as the ground opens in Spring. For Fall and Winter use, sow the early sorts from July to the middle of August, the Ruta Bagas from June to the middle of July. They may be sown either broadcast or in drills. The best crops can be raised from drills, 18 inches apart, and the plants thinned to six inches asunder. One ounce to 150 feet of drill, I found per acre in drills.

Early Purple Top Munich—The best extra early turnip, good quality. 10 cts. oz.; 25 cts. 1/4 lb.; 50 cts. 1b

Purple Top Flat Strap Leaf—The popular early variety, excellent for market or private gardens, 10 cts. oz.; 20 cts. 1/4 lb.; 40 cts. 1b.

White Flat Strap Leaf-The best early white variety, for table or market use. 10 cts. oz.; 20 cts. 1/2 lb.; 40 cts. 1b.

Long White, or Cow Horn—Grows quickly, partly above ground; very productive; flesh white, fine grained and sweet, of excellent quality for family and market gardeners' use. 10 cts. oz.; 20 cts. $\frac{1}{4}$ 1b., 50 cts 1b.

Purple Top White Globe-An early variety, very heavy crop

per. 10 ets. oz.; 20 cts. 1/2 1b.; 50 cts. 1b.

Yellow Aberdeen—Very hardy and productive, fine form and

excellent variety. 10 cts. oz.; 20 cts. ½ lb.; 40 cts. lb.

Seven Top—Very hardy, is left standing in the ground during the Winter in the Southern States, in the Spring yields abundant foliage for greens. 10 cts. oz.; 20 cts. ½ lb.; 40 cts. lb.

White Egg—Early, egg shaped, white, fine and sweet. 10 cts. oz.; 20 cts. ½ lb.; 50 cts. ½

20 cts. 1/4 lb.; 50 cts. lb.

RUTA BAGA or SWEDISH TURNIP.

The Ruta Baga Turnip is extensively grown as a farm crop, the roots are close grained, very hard and will endure a considerable degree of cold without injury, excellent for the table in early spring,

Improved American Purple Top—A fine variety, grown both for table and for stock, flesh solid, fine quality, keeps well until Summer. 20 cts. 1/4 lb.; 50 cts. 1b.

Carter's Imperial -A purple top, yellow variety, productive, one of the best for field culture. 20 cts. 1/4 1b. 50 cts. 1b.

White Sweet German—A white, globe-shaped variety, superior for table use, of excellent quality, good keeper. 10 cts. oz.; 20 cts. 1/2 lb.;

HERB SEEDS.

Sow early in April or May, in a sheltered, well-prepared spot in the open ground, either broadcast or in shallow drills about seven inches Thin out the Plants thus raised, and keep clear from weeds few sweet aromatic and medicinal herbs are very valuable for flavoring soups, etc., and care should be taken to harvest them properly on a dry day, as they come into full blossom, then dry quickly and pack closely, entirely excluding the air.

SELECTED SEED POTATOES, (Kartoffel, Ger.)

WE grow our Seed Potatoes in the best northern districts and expressly for seed purposes. As prices are liable to vary, we shall be pleased to give quotations on application. Our supply has been secured from reliable growers, and include the following varieties. Prices subject to change.

Early Ohio - A seedling of the Early Rose, a week earlier, if excellent quality, tubers round and oblong in shape, flesh solid, cooks dry and mealy. 50 cts. peck; \$1.50 bu.; \$3.75 bbl.

Early Rose - The leading variety for earliness and productiveness. 40 cts. peck; \$1.25 bu.; \$3.25 bbl.

Early Six Weeks—Extra early, tubers oblong in shape, flesh solid, cooks dry and mealy. 50 cts. peck; \$1.50 bu.; \$3.75 bbl.

Burbank's-A white-skinned, medium, early variety, with few eyes, flesh fine grained and of excellent flavor, producing a large crop of marketable potatoes, 40 cts. peck; \$1.15 bu.; \$3.00 bbl.

Chicago Market—Very popular, early, good quality and yields well. 40 cts. peck; \$1.25 bu.; \$3.25 bbl.

White Star—Medium early, a very large cropper, fine floury texture and delicious flavor, being unexcelled by any other variety. 40 cts. peck; \$1.15 bu.; \$3 00 bb1.

Beauty of Hebron — Remarkably productive, tuvers oblong and of extra size, skin and flesh white, table properties good, and keeps well. 40 cts. peck; \$1.25 bu.; \$3.25 bbl.

enormously productive and of excellent flavor, splendid keeping qualities. 40 cts. peck; \$1.15 bu.; \$3.00 bbl.

ARTICHOKE—GIANT WHITE.

This makes an enormous yield, and a most nutritious and health-preserving hog and cattle feed. They also produce an immense quantity of sops, of which cattle, horses and mules are very fond, and which make excellent food when properly cured. Plant in rows four feet apart, dropping the tubers file the procedure inches apart in the rows. It requires about three bushels to plant an acre. The tuber can be divided the same as potatoes. 50 cts. peck: \$1.15 bu.; \$3.00 bbl.

SEED SWEET POTATOES.

Yellow and Red Jersey, Red Bermuda and Southern Queen - Write for prices. Ready for shipment about April 1st.

Seeds for the Farm.

By express or freight at buyer's expense. 10 cts. lb. extra if sent by Mail. The prices quoted are subject to change,

SEED CORN. (2 bu. Seamless Bags)

Clark County Champion—A white dent corn, extra early, good yielder. 40 cts. peck; \$150 bu.

Zxtra Early Huron Dent Corn—Earliest Dent Corn in the Inited States. Cf a bright orange color, has good size stock and ear, small, red cob, long, deep grain, rank strong growth and wonderful productiveness. 40 cts. peck; \$1.50 bu.

Champion White Pearl—The best white dent corn in cultivation will river in 100 days care of good size anormously production.

tion, will ripen in 90 to 100 days, ears of good size, enormously productive. 40 cts. peck; \$1.50 bu.

Improved Learning Yellow—Ears of good size cob red and

small, a strong grower and very prolific, a standard variety. 40 cts. peck; \$135 bu.

Hickory King—The largest grain with the smallest cob ever introduced in a white corn, the stalks bear two good sized ears each and will make more shelled corn to a given bulk of ears than any other variety. 40 cts. peck; \$1.50 bu.

Iowa Gold Mine—Early yellow dent, ears are of good size and symmetrical, color a bright, golden yellow, grain is very deep cob small and therefore dries out very quickly as soon as ripe. 40 cts.

Red Coh Engilemen A south

peck; \$1.50 bu.

Red Cob Ensilage—A southern type of large white corn, with red cob, strong, leafy stocks, and short joints, a general favorite. 30 cts. peck; \$1.00 bu.

Ensilage Corn, White—30 cts. pec!; \$1.00 bu.

Ensilage Corn, Sweet—There is nothing better for early fall green feed or for curing for winter than sweet corn. It h s the great merit of being so sweet an 1 palatable that cattle eat every part of the stalks and leaves, and consequently, none is wested. A favorite with dairy farmers. Also excellent for soiling. Can be planted a other corn or sown thickly in drills or broadcast. 50 cts. peck.

CHOICE SEED OATS. (Burlap Bags, 2 to 4 bu. 10 cts. each.)

Red Rust-Proof-This is the standard oats of the Southern States, yielding large crops when all other sorts were destroyed by rust. It is a large, heavy, reddish looking berry, very prolific.

White, Black, also Mixed—Market price.

FIELD PEAS

(2 Bushel Seamless Bags, 25 cts. oach.)

Canada Field Peas-Valuable for Northern climates for cattle feeding, and when sown with oats are excellent hog feed. Used as feed for pigeons, etc., and for green soiling. 6) cts. peck.

SOUTHERN COW PEAS.

Saves Fertilizer Bills and Improves the Condition of Soils Wherever Sown. Also Makes a Splendid and Nutritious Green Forage or Hay Grop.

There is no surer or cheaper means of improving and increasing the productiveness of our soils than by sowing the Cow Pea It makes an enormous growth, enabling the farmer to put plenty of nitrogenous vegetable matter into the soil at a small c. st.; nd so very largely enables him to dispense with the use of nitrogenous fertilizers. The Cow Pea, to a greater extent than other leguminous crops, has the power to extract this costly nitrogen from the atmosphere and to store the same in the vines and roots so that if the crop is cut off, the laud is still enriched and its condition improved. From 5 to 15 tons of green fodder per acre have been produced by the Cow Pea. To grow for hay they are most valuable, as they yield an immense quantity of feed of the best quality. For ensilage they are unsurpassed. Where it is desired to turn the whole crop under, as a soil improver, it is better to do so after the vines are partly dead. A good picking of the dried peas can be made before plowing under if desired. Cow Peas can be sown in May or June, at the rate of one to one and a ha bushel per acre.

Wonderful, Black Eve and Brown Eve—Produce largest There is no surer or cheaper means of improving and increasing the

Wonderful, Black Eye and Brown Eye—Produce largest crop of vines. 75cts. peck.
Clay and Black—Best for combination crop vines and peas. 75

cts. peck.

Whippoorwill — Best for peas, recommended for "hogging down." 75cts. peck. down."

Wild Cucumber is the Quickest and Hardiest Vine.

SOJA BEAN.

The SOJA BEAN is fast taking the place of Clover in sections where the soil is not the most fertile, both for hay and fertilizing purposes.

Recommended as the best leguminous plant for soil restoring as it is adapted to ALL SOILS. It is a sure cropper. Unsurpassed for hay, claimed to be superior to Clover or Timothy. Plant in May, for it takes about ninety days to mature the hay and one hundred and twenty days to mature the seed. For hay sow about one bushel per acre either broadcast or drilled. Cut when in blossom. For seed sow in drills about twelve inches apart in the rows and have the rows about thirty inches apart. 75cts. peck,

SUNFLOWER.

Mammoth Russian-May be grown to great advantage in waste ground, from early spring to the latter part of July. An excellent and cheap food for fowls. Plant four quarts to acre. 10 cts. 1b.; \$4.00 per 100 lbs.

BROOM CORN.

Improved Evergreen—The best for general cultivation, brush firm, of good length and bright green color. 10 cts. 1b.; \$2,50 bu.

Dwarf-Grows from 3 to 4 feet high, with straight brush. 10 cts. 1b.; \$2,50 bu.

California Golden-A strong growing variety much resembling the Evergreen, but longer brush, and a bright golden color when ripe. 10 cts. 1b.; \$2.50 bu.

SORGHUM OR SUGAR CANE.

Orange Cane-A strong grower, much more juicy than any other variety, the stalk is heavier and a little earlier than the Amber. 5 cts. 1b,

Amber Cane-This popular and well-known variety makes the finest quality of both sugar and syrup. 5 cts. 1b.

Imphee or Red Top-An old standard sort, and undoubtedly one of the best that has ever been introduced. 5 cts. 1b.

KAFFIR CORN.

A new variety of Sorghum, forming low, stocky and erect plants, producing from 2 to 4 heads of grain on each stalk, heads long and narrow, and filled with white grain which are greedily eaten by all farm animals, matures about the middle of October, resists drought like most Sorghums and furnishes excellent fodder, cultivate same as corn. 5 cts. 1b.; \$1.00 bu.

SPRING VETCHES, OR TARES.

(Vicia sativa).

A species of the pea grown extensively in England, and to a considerab e extent in Canada for stock Culture same as Field Peas 1½ bushels per acre. 10 cts. 1b. Write for price per bushel. Culture same as Field Peas. Sow

SAND, WINTER OR HAIRY VETCHES.

(Vicia villosa).

A very hardy forage plant, growing well on soils so poor and sandy that they will produce but little clover. The plants when mature are about 40 inches high, ard if cut for forage as soon as full grown and before setting seed, they will start up again and furnish even a larger crop than the first. Sow 1½ bushels to the acre. 15 cts. lb. Write for price per bushel.

DWARF ESSEX RAPE.

A forage plant of highest value. It can be sown in April for an early crop, and for fall crop in July, August and September, and still later further south. It is sown broadcast 6 lbs. to the acre, but is better drilled, in which case 3 lbs. to the acre will suffice. In a few weeks from the time of sowing, sheep, hogs or cattle can be turned on it; all reports agree that they gain weight faster on this than any other fodder, as it can be sown after other crops are off; the gain in fodder is secured at a nominal cost. Stockmen, Dairymen and Farmers have proved its value. 10 cts. lb.; \$7.00 per 100 lbs.

PEACH PITS.

We have for years made the handling of peach pits a specialty, annually securing our stocks from districts entirely free from the yellows and are prepared to furnish the best. Prices furnished on application.

MOCKING BIRD FOOD.

For Thrushes, Mocking Birds, Black Birds, Nightingales and all soft billed birds. Directions for use on each package. 35 cts. per package.

Every One Should keep a copy of all orders. Should there be any mistake made, it will be known just what it is and may save unpleasantness.

Recleaned Grass and Clover Seeds.

THIS department has been our leading specialty for many years. While our Office and Retail Department building is one of the largest, best equipped and most conveniently situated in the State, still we have added a mammoth warehouse and cleaning department containing over 60,000 square feet of floor space, which, with the addition of the best improved machinery, makes our capacity about four times greater than before. Our facilities can not be excelled.

We now run by power 12 improved combined cleaners and separators, also power corn shellers, etc.

As the prices are constantly changing, quotations are subject to market fluctuations. Where customers are in need of large quantities, we will be pleased to quote lowest market prices. All orders with cash filled at the lowest market price on day of receipt.

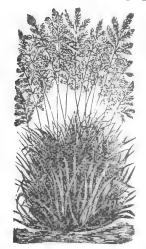

2 bushel Burlap Bags, 10 cents each.

2 bushel Seamless Cotton Bags, 25 cents each.

10 cents per pound extra if sent by mail.

Emerald or City Park Lawn Grass Seed.

(See 3rd page of cover for fall description.)

Kentucky Blue Grass.

This grass is almost universally known, and furnishes a moderate supply of pasture of the best quality. It varies in appearance and size according to soil, and in some parts of the country grows spontaneously. It stands drought very well, and if allowed to grow up in fall without grazing, makes a good winter pasture. Sow in fall or spring at the rate of two to three bushels per acre.

Fancy, 25 cts. 1b.; \$2.75 to \$3.00 bu.

Write for special prices on large lots.

Meadow Fescue.

This thrives in all soils, excellent for permanent pasture, starts early and is very productive; grows two to three feet high, and does well in almost any soil; makes fair hay. Sow in September or early in spring, at the rate of one to one and a half bushel per acre.

Extra Fine, 20 cts. 1b.; \$2.50 bu. Second Grade, 15 cts. 1b.; \$1.75 bu.

Perennial Rye Grass.

(Imported English Blue Grass).

Ls considered quite valuable, as it affords pasture quite early in the spring. The leaves are flat, long and glossy; the stalks rather short, seldom over 18 inches in length. The seeds are large, strong and make a vigorous young plant soon after sowing. The grass is quite variable in size and appearance. Sow early in spring at the rate of one to one and a half bushel per acre. 15 cts. 1b.; \$2.00 bu.

Italian Rye Grass—An early rapid grower, producing large leaves and succulent food. It does best in moist soils. Sow early in spring or fall about 25 lbs. per acre. 15 cts. lb.-

Sheep's Fescue—Grows naturally on light, dry, sandy soils and mountain pastures. It is considered quite valuable as a mixture with other grasses for permanent early spring pasture. 20 cts. 1b.

Orchard Grass.

One of the very best grasses in cultivation, and rapidity coming in favor. If cut just at the coming into bloom (as it always should be) a good second crop will follow and sometimes even a third. Is recommended for sowing with red clover as they come into flower at the same time. Orchard Grass is one of the earliest grasses, yields immense crops, and makes the best of hay; it endures considerable shade, and is much used for sowing in orchards. 1½ to 2 bushels of seed will sow an acre. 15 to 20 cts. 1b.; \$1.50 to \$2.50 bu.

Red Top.

This perennial native grass produces rather late in the season a

reddish purple, or greenish panicle of flowers. It thrives best on low land, where it cuts a good crop of rather light

crop of rather light hay of fair quality. It is very suitable for pastures on low ground. Sow in September or early spring at the rate of 1 to 2 bu per acre.

Prime, 8 cts. 1b.; 75 cts. bu. Choice, 10 cts. 1b.; \$1.00 bu. Fancy, 15 cts. 1b.

Timothy—This grass stands at the head for meadows, particularly for hay that is to be baled for market, if cut at the proper time which is when in full bloom. I prefer to seed it in the fall—September—if it is seasonable, and if, by any reason, there is a partial failure, go over the ground in spring Sow one fourth to one-half bushel seed per acre. Market price.

Sweet Vernal—Is very fragrant especially when bruised. For a mixture with other grasses for pasture it is quite valuable, as it starts early in spring and grows until late in the fall. For hay its chief merit is its fragrant odor. It is a vegetable condiment rather than a grass of nutritive value. 20 cts. 1b.

Bermuda Grass - A very valuable grass for the south, but will not endure frost. 60 ets. 15.

We are not only sellers, but one of the largest "cash" buyers in the State, of every variety of GRASS and FIELD SEEDS, Fancy Seed Grain, etc. Would be pleased to receive Samples of any Fancy Stock you may have to offer.

GRASS SEEDS, Continued.

Johnson Grass - A perennial, a rapid grower, long, cane-like roots, the leaf stalk and panicle of this grass resembling those of other Sorghums. Sow at the rate of one bushel per acre, and should be sown in August or September to secure a good crop the following year. 15 cts. 1b.

Tall Meadow Oat Grass-This is a perennial grass, has broad, flat leaves and grows about 3 feet high, has an abundance of long, fibrous roots penetrating deeply in the soil enabling it to withstand drought and cold. Sow at the rate of two

bushels per acre, in early fall, on sheep pastures. 25 cts. 1b. Wood Meanow Grass-This grass, as its name implies, is found naturally in shady woods, and is well adapted to growing under trees, but will also on exposed places and on light, thin soil. 45 cts. lb.

German or Golden Millet-True Southern grown.—It has been fully established that German Millet grown in the Northern and Western States becomes deteriorated, and s on resembles Fox Tail in quality and yield. This is due to the fact that German Millet is a native of a warm climate. Southern grown seed is worth double that of Northern or Western grown, if you want a good crop of hay. We are prepared at all times to fill orders at market prices.

Missouri or Common Millet -

Market price.

Hungarian Grass—This grass resembles the millet, it is of fine growth, and makes an excellent hay. Market price.

Special Grass Mixtures.

We are prepared to furnish seeds adapted to all soils and all situations and for all purposes. Our best mixture is made entirely with choice, recleaned seeds, while in the second quality we use the same seeds, but without recleaning and will be equal to the qualities usually to be had on the market.

Our mixtures will have a uniform weight of 16 lb, to the bushel. Quantity to be used per acre, 1½ to 2 bushels, and half this quantity for renovating. In ordering always state the soil and position on which you wish to use it. 2 bushel seamless bags, 25 cts. each. No extra charge for burlap bags for 5 bushels or more.

Special Prices on Large Quantities.

CLOVERS.

Red Clover-In ordering always state quality desired, otherwise will send the best. The grades of the market are Good, Prime and Choice. Market price.

Sapling, Mammoth, Large, English or Pea Vine Clover-Trifolium Pratense Perenne. Compared with common red clover, its flowers, foliage and stems are of a darker color and its seed is the product of the flowers of the first crop. while the common red clover is the product of the flowers of the second crop. It is valuable when sown with other grasses for mixed hay, as it ripens later than the common red clover and about the time that timothy, orchard and other grasses ripen, thereby making the hay a much better quality. The best for soiling purposes. Market price.

Sainfoin or Esparsette-A perennial, the duration of good crops being about 8 years, grows 2 to 3 feet high, flowers in spikes from June to August of a beautiful pink or flesh color, on long foot-stalks. 25 cts. 1b.

White Dutch Clover—Trifolium Repens. Grows naturally in pastures in a great variety of soils and situations and is an indispensible requisition in all parks and lawns. 25c lb.

Alfalfa Clover-The most valuable forage plant. thrives best on a sandy loam, the richer the better, and in such will produce several crops every season. In the driest and most sultry weather, when every blade of grass withers, Alfalfa is as fresh and green as in the spring, as its roots go down from 10 to 20 feet to the moisture of the ground. Although a prodigious yielder, it does not exhaust the soil, but rather improves the

ground by the decay of its long roots, and converts it into rich ground, full of vegetable matter. The seed may be sown early in the spring. Sow twenty-five bounds per acre. 20 cts. 1b.

Alsike or Swedish Clover So-called from being intermediate in its appearance between the red and white clovers, possessing qualities common to both, being productive, sweet and permanent. Will grow well on very poor soil. Should be used in mixtures of grasses and clovers for pasture, and will improve the quality of the hay if mixed with the meadow grasses. It is also esteemed highly for pasturage for bees. 20 cts. 1b.

PROMPT AND GAREFUL ATTENTION www · www

Is given to all orders either large or small. Remember, we fill orders of any amount, but when ordering, if possible, make orders not less than 25c, as when orders are smaller than this it is generally at a loss to us.

CLOVER SEED, Continued.

Scarlet or Crimson Clover—Scarlet Clover is an annual and should be sown in August, September or October. It germinates quickly, grows very rapidly through the fall and winter, blossoms about May 1st. This clover can be sown after crops have been removed from the ground. In this way it will prove of inestimable value in holding the valuable nitrates in the soil that are otherwise washed out of the bare ground, furnishes fall, winter and spring pasture and enriches and stores up plant food for the next crop. Sow at the rate of ten or fifteen pounds per acre, covering with harrow or cultivator. Nothing like it for sowing on ground after potatoes are harvested. 15 cts. 1b.; \$1.25 10 lbs.; \$10.00 100 lbs.

Bokhara Clover - A large plant quite valuable for soiling, producing several crops in a season, its branches bear numerous white flowers, which are sweet and fragrant, excellent pasture for bees. 25 cts. lb.

If larger quantities of the above are wanted, write for Special Prices.

FERTILIZERS.

Our experience of twenty-five years in the business as manufacturers' agent of high grade fertilizers and our facilities for obtaining material of the first-class, enables us to offer the highest grade of goods to be found anywhere, and when we go into a neighborhood, all our customers are our reference after the first crop. The following goods are in great demand

BONE PHOSPHATE.

ANALYSIS:

Ammonia			$1\frac{1}{4}$ to	2	per cent.
Available Phos. Acid		٠	8 to	9	per cent.
Insoluble Phosphoric Acid			1 to	2	per cent.
Total Phosphoric Acid			9 to	10	per cent.
Potash					

Bone Phosphate - For all grain crops, and especially good for spring crops and vegetables owing to its ammonia and potash. This grade is best adapted for wheat seeded on corn land, also for grass following wheat. 25 cts. 5 lbs.; \$1.75 100 lbs.; \$2.00 125 lb. bag; \$13.00 ½ ton; \$25.00 ton.

Land Plaster—Is adapted to a great variety of uses, and sales are largely increasing as its value becomes better known. If applied as a top-dressing for grass and clover crops in the spring, it greatly increases the growth and yield of same, in fact, its use is almost certain to insure a good stand of clover. If it is sprinkled in stables, poultry houses and on manure piles, it will prevent ammonia from vaporizing, thereby greatly increasing the value of farm manure. On account of its economical usefulness and effectiveness, it should be liberally used on every farm. \$1.15 200 lb. bag; \$1.35 bbl. about 275 lbs.; six barrels or more, \$1.20 bbl.

Canada Hardwood Unleached Ashes — Effectually destroys the moss and sweetens the ground. \$1.25 100 lbs.; \$2.00 200 lbs.

FERTILIZERS, Continued.

BONE MEAL (Lawn Fertilizer).

ANALYSIS:

Ammonia $2\frac{1}{2}$ to 3 per cent. Bone Phosphate 50 to 55 per cent.

To produce a rich, luxuriant and lasting growth of beautiful dark-green grass, use our lawn fertilizer. It is quick in action, its effect being seen immediately after the first rain. It acts energetically on the unfolding leaves, goes directly to the roots, stimulates them to activity and causes the grass to thicken. A firm growth follows, which remains green, luxuriant and velvety for the whole season. Stable manure is very unsightly, gives an unpleasant odor, disfigures the lawn, and contains weeds and other foreign seeds. The fertilizer should be applied in winter or spring, and sown broadcast on a damp day or just before a rain. 40 cts. 10 lbs.; \$1.00 35 lbs.; \$1.25 50 lbs.; \$2.00 100 lbs.

Sheep Manure - This is a pure, natural manure, and a most nutritious food for plants. Its effect is immediate, more lasting and healthful than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest and quickest liquid manure, rivaling guano, without any deleterious effects. Nothing equals it for general use on flower beds, or for the vegetable garden. No other fertilizer produces such a marked and permanent effect upon lawns. No raking off required. No seeds of foul weeds in it. No offensive odor. It is clean to handle. Absolutely safe to use in any quantity or in any manner. For lawns use at the rate of from 300 to 500 pounds per acre. For pot plants mix one part of sheep manure to six parts of soil. For use in the vegetable garden spread over the surface and dig in. Being soluble, it readily makes a safe liquid manure (1 pound to 5 gallons of water per day can be safely used.) 10 cts. 1b.; 25 cts. 5 lbs.; 50 cts. 15 lbs.; 75 cts. 25 lbs.; \$1.50 100 lbs.

Pure Bone Meal — 25 cts. 5 lbs.; 40 cts. 10 lbs.; \$1.00 30 lbs.; \$1.25 50 lbs.; \$2.00 100 lbs.

Nitrate of Soda-10 cts. 1b.; \$5.00 100 lbs.

Kainit, Potash Salts—Use 200 to 400 pounds per acre. For small grain drill in, for cultivated crops plow under. Single bag, \$2.25 bag; 5 bags or more, \$2.00 bag; \$19.00 ton.

In addition to the above first-class goods, we have PURE RAW BONE MEAL AND ACIDULATED BONE. Also other Fertilizers on application.

MOSS.

Sphagnum — For packing and growing orchids, etc. 10 ets. 1b.; \$1.25 bale.

Green, Sheet-40 cts. bale.

CAUTION.—Buyers of clovers should be very careful about buying seeds offered below the market price, as there are many samples adulterated to a large extent with Yellow Trefoil and other cheap, worthless seeds. We endeavor to be extremely careful of our source of supply.

OWER SEEDS

GENERAL

E TAKE PLEASURE in presenting to you our revised Flower Seed List, embracing only the best and most popular varieties. Our Flower Seed trade has increased very rapidly the last few years, which is very gratify ing to us, as it speaks well for the quality of the seed we send out. Look it over carefully and add at least one or two packets to your vegetable seed order. It will pay you well. We do not sell old seeds, neither do we mix old seeds with new—every seed is new, fresh and clean. Everything is arranged in alphabetical order.

Annuals grow from the seed, bloom and perish in one season. Biennials generally bloom the first and second year and then die. Perennials bloom the second year and every year thereafter, some perishing after three or four years, others continue indefinitely. Some few Perennials, if started early, bloom the first year.

Full Cultural Directions on all Flower Seed Packets.

PANSY.

This lovely flower a favorite with every one, is too well known to need any description. It will flower in the middle of summer if planted where it is somewhat shaded from the hot sun, and especially if furnished with a good supply of water, but in almost any situation will give fine flowers in spring.

187.

188.

PANSY. Hardy Perennial. Pkt. Bugnot, Cassier and Odier Strains-Superb mix-15c 169. Cassier's Giant—The flowers of immense size, of good substance and fine form, while the plants are of neat, compact growth, 15c 170. THE FAMILY GARDEN CAN BE BEAUTIFIED by planting a few of the annual flowers offered in this catalogue. A row of Sweet Peas, a bed of Nasturtiums, etc., will also furnish an abundance of flowers for decorating the table.

Summer Flowering Bulbs and Roots.

The summer flowering bulbs and roots are inexpensive, very easily grown, require scarcely any care and produce some of the most showy and beautiful of all summer and autumn flowers. Before hard frost the bulbs must be taken up and stored away in some place secure from frost until spring.

At the prices quoted on single bulbs or by the dozen, we send either by express or mail prepaid, by the 100 or 1000 at purchaser's expense. No less than 6 will be sent at the dozen, nor less than 50 at the 100 rate.

CANNAS.

Canna tubers should not be put into the ground until the soil has become warm. They commence blooming in June and continue until late in September. Every shoot bears a flower, and these shoots are being constantly produced throughout the blooming season.

DWARF FRENCH CANNAS.

Alphonse Bouvier-6 feet. Foliage green, crimson flowers. Alsace-4 feet. Green leaves, lemon changing to white. Chas. Henderson-3 feet. Fine green foliage, crimson. Flamingo -3 feet. Glowing crimson. Appropriately named. Florence Vaughan -4 feet. Yellow, thickly spotted with red.

A famous Canna, thoroughly tried and hard to beat. Madam Crozy-4 feet. Crimson scarlet, bordered with golden yellow.

Peachblow-Bears fairly large trusses of medium-sized flowers of white changing to rose, with a distinct blotch of pink at the neck of the flower. Green foliage.

Egandale-4 feet. Bronzy foliage and soft current red flowers held well above the leaves, the best of its type.

Queen Charlotte-3 feet. Scarlet bordered with gold.

ORCHID FLOWERED CANNAS.

Austria-6 feet. Large flowers and foliage. Flowers pure canary yellow, spotted with red spots.

Burbank-5 feet, Individual flowers 7 inches across, Canary yellow, with small crimson spots.

Italia-5 feet. Flowers red, bordered with golden yellow.

Any of the above varieties, dormant roots, 10 cts. each; 75 cts. doz.

Mixed Owarf Cannas—6 cts. each; 60 cts. doz. Mixed Tall Cannas—10 cts. each; 75 cts. doz.

DAHLIAS.

The Dahlia is one of the showiest of our autumn flowers. Commencing to flower in August they are in a perfect blaze of bloom until stopped by frost in late autumn. They delight in a deep, rich soil; should be planted 3½ to 4 feet apart, and be tied to heavy stakes to prevent strong winds from breaking them down.

MADEIRA VINE.

The Madeira Vine is of rapid

growth, with dense and beautiful foliage, twining to great height. It grows anywhere, but does better in a warm, sunny, sheltered location. It is also a very pretty plant for training around the windows in the house. Strong Tubers, each, 5c.; 3 for 10c.; p.r doz., 30c.

Note - We do not send BULBS of any kind by mail until all danger of their freezing is passed, usually about April 1st.

Stock and Poultry Supplies.

Rust's Egg Producer.

You can get plenty of eggs at all seasons by using Rust's Egg Producer. It makes fowls vigorous and healthy, shortens the moulting period, prevents and cures leg weakness, etc, and is just what is needed to make poult y keeping the most preatable operation on a farm. You can feed Rust's Egg Producer every day for two or three weeks, at a cost of one cent for each hen and get surprising results.

1 1b. box 25c. If by mail, add 16 cts. per lb. for postage.

Rust's

Havens' Climax Condition Powders. No owner of Poultry or Stock should be without it.

It cures diseases, and keeps stock and fowls healthy; the only real cure for gapes and fowl cholera; expels worms from horses, etc.; gives great and lasting benefit in heaves, without the slightest injury. It is not a food, but an honest medicine, at an honest price. 13 oz. package 25 cts. If sent by mail, 15 cts. extra for postage.

Rust's Havens' Roup Pills.

They are entirely free from everything harmful, and the best remedy ever discovered for Roup, Catarrh, Colds and Distemper.

25c per box of 48 pills.

Rust's Lice-Killing Powder

For dusting Fowls and Nests. 5 oz. box, 10c; 16 oz. box, 25c. The 25c size by mail, 40c.

Meyer's Poultry Spice

For Poultry, specially prepared. ½ lb. pkg., 15c; 24 oz. pkg, 25c; 5 lb. pkg.. 60c.

Meyer's Horse and Cattle Spice

For Horses, Cattle, Sheep and Pigs. 2 lb. pkg., 25c; 5 lb. pkg., 60c; 25 lb. pail, \$2.75.

Acme "Chick Seed"

The best mixture on the market for young chicks. 5c lb.; 30c 10 lbs.; \$1.25, 50 lbs.; \$2.00, 100 lbs.

International Poultry Food.

Absolutely pure and highly concentrated. One small leed of this has more medical effect than a very large one of many others. Each box contains about 100 feeds. 25c box.

International Stock Food.

Cures and prevents disease in horses, cattle, hogs, sheep, etc. Insures health and rapid growth for all young stock. A peculiar combination of medicinal ingredients makes this a superior and safe food for stock. 25c and 50c box.

Grain and Seed and Screenings for Poultry

Free from grit or shell. 60 cts. per bu.; \$1.50 per 100 lb.

Crushed Oyster Shells.

10 cts. 5 lbs.; 25 cts. 15 lbs.; 75 cts. 100 lbs.; \$3.25 for 500 lbs.

Pure Granulated Bone

For poultry and cattle. 5 cts. 1b.; \$3.00 per 1001bs.

Mica-Crystal Grit.

For Poultry, Pigeons, Chickens, Ducks, Geese, Turkeys and Birds.

Many tests have been made to demonstrate the worth of Mica Crystal Grit, and in every instance, no matter how small the particles were remaining in the gizzard, they still retained their sharp cutting edges. The iron in Mica-Crystal Grit is practically all contained in the mica, and is in its purest and best form. The effect of the iron in

toning up the physical condition of your poultry, and the high yellow color produced in the yolk of the egg, is, of itself alone, worth more than all the other grits combined. 10 cts. 5 lbs.; 75 cts. 100 lbs.

China Nest Eggs.

3c each; 30c per doz. If by mail, 20c per doz. extra.

Lump Rock Salt For Stock.

Does not create thirst. Stock will do 20 per cent. better wherever it is fed. Will go five times as far as common salt. 10 cts. 5 lbs.; \$1.00 lbs.; \$3.50 500 lbs.

Drinking Fountain For Poultry.

Can be filled easily. Water always clean. Chickens can not get drowned in it. 25c ½ gallon; 35c 1 gallon.

Sunflower Seed.

Good egg producer. 10 cts. 1b.; \$4.00, 100 lbs.

Pigeon Peas.

For feeding pigeons. 50 cts. peck.

Cotton Seed Feed Meal.

The most economical article for feeding stock now known. Directions for feeding: Milch cows and fattening cattle, mix with other feed, beginning for each animal with one pint at a feed, increasing gradually for a week or ten days, to two quarts at each feed. Fattening hogs one quart Horses one-half pint every other day. Sheep one-half pint. Prices subject to change. \$1.50 per 100 lb. bag.

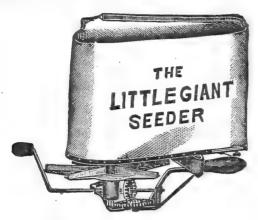

Linseed or Oil Cake Meal. (Process)

It is a great flesh former, milk and butter producer, and on fair test will prove to be an econoical cattle for I Prices subject to change. \$1.90 per 100 lb. bag.

SEED SOWERS AND SUNDRIES.

The Little Giant Broadcast Seed Sower.

For sowing wheat, oats, rye, rice, flax, grass seed, clover seed, etc., in fact, any kind of seed broadcast. No careful, economical farmer will continue to sow his seed by hand

(the old style) when he can get one on these machines at our reduced prices. They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect on the crop. It weighs but three pounds, is cheap and always in order. **Price**, \$1.50.

The Cyclone Seeder.

The Cyclone is a geared machine and works with a crank which seems to be the favorite; is strongly built of the best material. It has a 4-inch clear throat and cannot be choked, even with strawy oats. It will with proper care last a lifetime. **Price**, \$1.40.

The Cahoon Seed Sower.

The difficulty in sowing is entirely overcome by the use of the Cahoon Broadcast Seed Sower which can be handled with ease by an entirely inexperienced person and will sow much more evenly than can be sown by hand. **Price**, \$3.00.

The Queen City Broadcast Seed Sower.

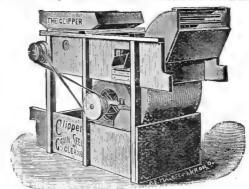

A practical machine for sowing correctly all varieties of farm seeds. Perfect in distribution. Mechanically constructed. Neatest and Most simple. Has automatic cut-off and regulator. Is light running and strong in construction. The lowest priced standard machine manufactured.

Price, \$1,25.

Fiddle Bow Seed Sower.

Has been greatly improved, will sow all kind of grain and seed to your perfect satisfaction. Price, \$1.10,

CLIPPER SEED AND GRAIN MILLS.

These mills are especially adapted for cleaning grain, clover and timothy seed. No. 1, for grain and clover, \$20.00. Descriptive circulars and prices for larger sizes for either hand or power, sent on application.

Reddick All the old tra bett one-third No mo

Reddick Mole Trap.

All the old traps boiled down to a better one at one-third the old price.

No
mole
can
pass
under
it
and
live.

Price, 75 cents.

Mosher Bag Holder.

.. Best on the market...

With stand, Price, \$4.00.

Lightning Bag Holder.

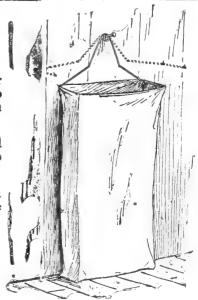

The best bag holder ever offered for the money. No farmer or grain dealer can afford to be without one.

Made of heavy wire and adjustable to either Burlap or Seamless bag.

We use several of them in our warehouse and they give good satisfaction.

...PRICE...

25 cents each. \$2.50 dozen.

Come and see our establishment and be convinced that we are "Headquarters for seed "

Atomizers, Bellows, Sprayers, Etc.

Lenox Knapsack Sprayer.

22 QUARTS. For Garden, Field, Grape and Small Fruit Culture.

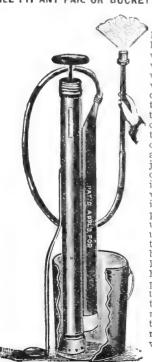

One man does the work of twelve and need not One man does the work of twelve and need not stoop down. Spray as fast as you walk. No waste whatever. Spray stops by releasing the pressure of the thumb. No machinery to get out of order. Simple as your milk can. Has an agitator on the left side to stir the liquid. Costs less than all others. Never rusts. Never out of order Adjustable to man or boy. To spray trees and vines turn nozzle up. We recommend it to be the best and cheapest on the market. Price \$3.00 each.

Extra Tube. Rubber bulb and rose to work with both hands. \$1.50.

both hands. \$1.50.

LIGHTNING WHITE WASH SPRAYER AND FORCE PUMP.

VILL FIT ANY PAIL OR BUCKET

This is the only spray Pump that will spray WHITE WASH without clogging. It will do much better work than can be done with a brush especially on rough surface, as the force with which the mater al is applied causes it to penetrate the small crevices and openings thus making a complete and perfect job. It is constructed of heavy galvanized iron, with blass tops valves, a material that is n t affected by the poisonou arsenities used in different formulas for spraying fruit trees, vines and shrubbery. It is made with large air chamber and has ball valves, the pressure being held in the air chamber and on the nose, so that the rozzle throws a continuous spray and is not affected by the up-

ard stroke.
Price, \$2.00 each.

ACME ATOMIZER OR SPRAYER.

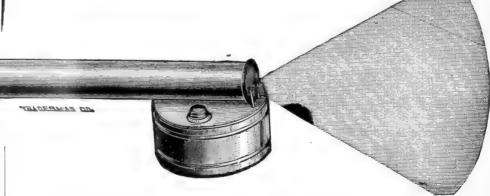

For Spraying Paris Green and Other Insectcides on Potato Vines, Shrubs, Small Trees, Tobacco House Plants. Live Stock and Poultry.

A great labor saver on the farm and in every garden, barn greenhouse, orchard and hennery. It will apply the Finest Possible Spray on any object desired and exterminate any kind of insect life. Weighs only one pound; Can holds one and one half pints and will cover 750 hills of potatoes, and Kills the Old Bugs. Well and simply made, combined into the strongest possible shape, it cannot come apart, and easily cleans itself when turned upside down. Was thoroughly tested last season and gave universal satisfaction. Indispensable on every farm.

Prices: Heavy Tin, 40c each; Heavy Tin with Galvanized Iron Reservoir, 50c each,

PERFECTION DOUBLE ATOMIZER.

Two large sprays, fine as fog, widely distributed, are produced at one blast. Without dripping it will apply any liquid insecticide or disinfectant to any tree, shrub, plant or animal and exterminate any insect pest. Not a drop of solution is wasted, all is produced as spray. Any boy can kill every bug in a field of potatoes and haul the water himself. Price: Heavy Iin with Galvanized Iron Reservoir, 60c each.

ACME POWDER GUN—Dry Powder Blower.

The Acme Powder Gun is the simplest tool ever made for applying poison to growing crops. It is entirely independent of water or plaster. No poison is left about the fields to kill stock. It requires no base of supplies; all you need to carry is a can of dry insecticide and the gun. Without stooping—the elbow does it—it applies any powdered poison on any plant in any desired quantity, any time of the day. The elbow may be detached if desired. This tool is well made of the best material, and is thoroughly guaranteed. The bellows' sides are painted a bright vermillion and the handles finished bright. The leather is a fine russet. We also furnish a spreader for distributing the blast. Price, \$1.00.

Lightning Dry Powder Duster. WILL WORK UP AS WELL AS DOWN.

Easy to operate strong and durable, made of heavy tin nicely painted, will spray up or down or straight ahead, also under the leaves of plants, as the funnels and elbows are reversible, simply work the plunger back and forth when it will produce a large or small blast A useful instrument for exterminating potato bugs, cabbage worms and all sucking insects. It will handle insecticide in the powder, such as paris green, hellebore and slug shot; also used for tobacco plants and various other purposes. Price, 75 cts.

PREMIUM To every one who purchases SEEDS to the value of 25c or more we will present a large package of mixed Annual Flower Seeds, 100 varieties or more.

Full directions on all packages.

Insecticides.

Descriptive circular on application.

Hammond's Grape Dust.

It is a preparation to kill the destructive mildew that strikes the grape vine, affecting leaves, fruit and stems in unfavorable seasons, also for like use upon any other plant or trees affected with mold, mildew or rust mites. 10c lb.; 35 cts. 5 lbs.; 60 cts. 10 lbs.; \$5.50 100 lbs. By mail, 25 cts. lb.

Slug Shot.

Kills caterpillars, currant, gooseberry and cabbage worms, potato, melon, cucumber and squash bugs, rose slugs, rose lice. 15c 1 lb. carton; 30c 5 lb. pkge.; 50c 10 lb. pkge. By mail, 15c lb. extra.

Hellebore. (White Powdered.)

For destroying rose slugs, currant worms, etc. 10c 1/4 lb.; 15c 1/2 lb.; 25c lb. By mail, 15c lb. extra.

Bordeaux Mixture.

For black rot, mildew of grapes, potato rot, leaf blight of cherry, pear and other trees, etc. Supplied dry, 25 cts. 1b. Not prepaid.

Fir Tree Oil.

Soluble insecticide effectually destroying all kinds of pests to which plants are subject. Equally effective on animals, and is harmless to the skin and hands when used as a wash. Full directions with each can. 50c ½ pt.; 75c pt.; \$1.25 qt. Liquid insecticides can not be sent by mail.

Tobacco Stems.

Used for fumigating plants to kill insects. 5c lb., 50c 25 lbs.; \$2.00 bbl.; \$2.00 bale about 200 lbs. By mail, 15c lb. extra.

Persian Insect Powder. (Pyrethrum Roseum.)

. For destroying roaches, ants, fleas and other insects. 15c 1/2 1b.; 50c lb. By mail, 15c lb. extra.

Whale Oil Soap.

Makes an elegant wash for trees and plants, kills insects and eggs on bark. 15c 1 lb. (by mail, 30c;) 60c 5 lbs.

Paris Green.

Warranted pure. 15c ¼ 1b.; 25c ½ 1b.; 40c. 1b. Special prices on large quantity.

JJ { ^T}

"HORICUM"

To kill Scale and not trees. One spraying will not kill all the Scale, as many of them get under the rough bark. They are very minute, but their multitude makes the San Jose Scale a plague like the plagues of Egypt. To be diluted 16 to 20 or more times with water and sprayed. Pint, 25 cts. Quart, 40 cts.

Fairmount Weed Killer.

San Jose Scale Killer.
For Fall or Spring Use.

Kills Weeds Scientifically,

Germo Fly Killer.

A distinct chemical preparation, especially well adapted for the spraying of Cattle, Horses, Mules, etc. While Horses and Cattle are in pasture nothing will prove so beneficial as GERMO FLY KILLER. It should be sprayed on your stock, thus affording them perfect rest. Barns, Hog pens and Chicken Coops sprayed with GERMO FLY KILLER will free them from all kinds of pests, thereby eradicating completely the disease which they are the means of causing. Gallon 75 cts., half-gallon 50 cts.

The Glass Sprayer.

Having a glass reservoir which is made of the pattern of a Mason fruit jar, and any such will fit this sprayer; being oblong, gives a churning motion while the sprayer is being used, mixing the ingredients—and will not allow Paris Green to settle. The glass sprayer will not corrode or rust out. The screw cap is made of heavy zinc, and the air chamber and jackets are made of heavy tin, nicely painted a bright red. The reservoir filled with water and a teaspoonful of Paris Green is sufficient to kill 2,000 hills of potato bugs. Price, 60 cts. each.

Pump-Little Giant Spray.

For spraying fruit trees, etc. Fine, coarse and solid stream nozzle, with malleable iron foot rest. Price, \$3.90 8 ft. extension pipe, price, 40 cts. each.

LAWN SUPPLIES.

Genuine Philadelphia Lawn Mower.

The Philadelphia Lawn Mower has stood the test for years, and is still acknowledged to be one of the best and a strictly High Grave Mower.

Style K-5 blades, 10-in. wheel, 6½-in. cylinder. Single Pinion, geared on both sides. The greatest diameter of cylinder, with five blades, insures fine cut, and with its large driving wheels, is light running.

14-in. \$6.25; 16-in. \$7.00; 18-in. \$7.75; 20-in. \$8.50.

Style C — 4 blades, $8\frac{1}{2}$ -in. wheel, $5\frac{1}{4}$ -in. cylinder. This style medium high wheel is to supply a demand for a mower, which has real merits, and is light running, durable and easy to handle.

14-in. \$5.25; 16-in. \$6.00; 18-in. \$9.50; 20-in. \$7.25.

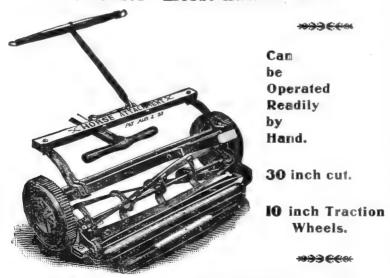

Style M-3 blades, 7-in. wheel, 5¼-in. solid cylinder, with blades bolted on. This is the original Philadelphia 1870 pattern mower, and for general purposes is very popular, adapted for rough as well as smooth lawns.

14-in. \$5.25; 16-in. \$6.00; 18-in. \$6.50; 20-in. \$7.25.

Drexel and Monarch Lawn Mowers.

The Best Lower Grade Mowers made. Constructed upon mechanical principles.

The "Chief" Horse Lawn Mower.

This Mower is used in our principal parks and cemeteries. The draft with the horse is the same as when operated with handle. Positively no tipping up with rear of the Mower.

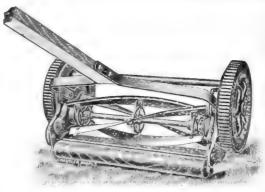

Price, complete \$18.00

We can also supply the Philadelphia Horse Lawn Mowers. Prices on application.

Grass Catcher.

Fits any Lawn Mower. Gathers all the grass. Leaves the lawn smooth and velvety. It can be adjusted to any machine in a moment. The Catcher is made of heavy Duck. In ordering give the size of mower on which you intend to use the catcher. 75c each.

F. & N. Ball Bearing Lawn Mower.

In the F. & N. Ball Bearing Lawn Mower is realized the culmination of the highest mechanical skill in Lawn Mower construction. No effort or expense has been spared to make this mower perfect in every respect. The material is

the best that money can buy. Where two parts are joined together in this mower they are machined with the greatest care so that they will fit together with mathematical exactness. As a result, there is no lost motion anywhere about the mower, it combines strength with lightness and is noiseless in operation.

UNION CYPRESS FLOWER TUBS.

An excellent new tub, cheap, neat and durable. Made from ⁷/₈ inch cypress, with iron handles and feet, 3 iron hoops and 2 coats of green paint.

No. $1 - 13\frac{1}{2}$ inch diameter, 111/2 inches high, \$1.00 each.

No. $2 - 14\frac{1}{2}$ inch diameter, 14 inches high, \$1.25 each.

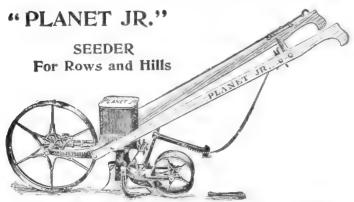

No. 3 - 16 inch diameter, 15 inches high, \$1.50 each.

The new Planet, Jr., Hill Dropping Drill is the Most Complete Machine in its line ever offered.

"Planet Jr." Farm and Garden Tools.

Space will not permit our showing and describing all of the "Planet Jr." tools, but we will send a fully illustrated catalogue free for the asking to any who desire it. "Planet Jr." goods are standard machines; the best, and you can rely on getting bottom prices from us on any of the "Planet Jr." goods.

"Planet Jr." No. 3 Hill Dropping Seed Drill.

A seeder that does not drop in hills is fast becoming a thing of the past. Why? Because all crops that are to be grown from seed and thinned to a regular stand, should be planted in hills at just the distance apart the plants are desired, for in drilling unless the seed is sown unnecessarily thick, there will not always be a plantat the proper spot, and the crop is therefore irregular. This machine not only sows in a continuous row, but also drops in hills, 4, 6, 8-12, and 24 inches apart. We can heartily recommend it.

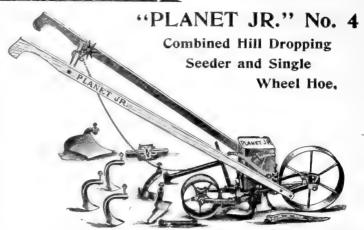

Price, \$10.50.

This Single Wheel Hoe has an 11 inch wheel with broad face, and a conveniently arranged and very valuable set of tools. It is very light, strong and easy running. Has adjustable handles and frame, and is the most perfect Wheel Hoe for market gardeners and private places. Frame changes in height: and the wheel to the other side of the frame, lo allow of hoeing both sides of the row at one passage. Price \$4.75.

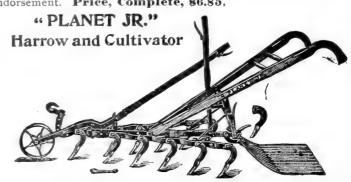

Probably no other cultivating machine is so widely known as the "Planet Jr." No. 8 Horse Hoe and Cultivator. It is so strongly built as to stand incredible strain, yet it is light and easily handled. Every part of the tool is perfected to make it valuable to the intelligent farmer, who knows the best is always the cheapest. Price No. 8 Horse Hoe, \$9.00; No. 7 Horse Hoe, \$8.50; No. 9 Horse Hoe, 7.50; No. 4 Horse Hoe, \$6.50.

This is exactly the same style of seeder as the No. 3 "Planet Jr." Hill Dropper. It is smaller in capacity, though still of good size, holding two quarts. It drops in hills the same as the No. 3, and in drills any thickness, handling the smallest paper of seeds perfectly. It is simple, durable and very light running. Thrown out of gear instantly and the flow of seed cut off, by simply raising the hardles. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes one of the most admirable Single Wheel Hoes of the "Planet Jr." family. Price, \$11.00. As a Drill, only \$9.00.

"PLANET JR." No. 12 Double Wheel Hoe, Cultivator and Plow. This tool combines in itself Price Complete the good points of its predecessors, with valuable new ideas. \$6.85. It has 11 inch whee 1s, which can be set at four different distand is tances apart the frame is malleable, with ample room for tool adjustment, and can be set at three different heights. The handles are adjustable, and the arch is of stiff steel, unusually high. The design of the frame is new, allowing the changes of the tools to be made without removal of the nuts from the standards. The machine has a large equipment, four pairs of tools in all, and the amount of work possible with this machine is almost incredible, covering the large range of wheel hoe work both in the garden and on the farm, and has our unqualified endorsement. Price, Complete, 86.85.

This tool has rapidly grown into favor with farmers, market gardeners and strawberry growers. It has a high frame, and the chisel shaped teeth cut an inch wide, each. Hand levers regulate width and depth while in motion, and the pulverizer prepares the ground capitally for the Seed Drill or for plant setting, and controls the depth of the rear teeth. It contracts to 12 inches and expands to 32 inches. Cultivates without throwing earth upon the plants, and the smooth, round throated teeth turn strawberry runners without injuring them. Price, plain, \$6.00; with wheel, \$7.25 complete, \$0.00.

For a Splendid Collection of Pansies or Sweet Peas try J. Chas. McCullough's Mixtures.

WHEN TO SPRAY AND WHAT TO USE.

The following brief directions for the spraying of fruits and vegetables have been compiled as the result of several years' experimenting with different materials and it is believed they can be followed without injury to the crops and with profit to 'he owner. It will pay to spray all fruit plants in the spring with copper sulphate solution and the second and third opplications as given, can generally be made with profit. Never spray with arsenites while the trees are in blossom, as the bees will be poisoned; they are necessary to fertilize the flowers.

PLANT	1st Application	2nd Application	3rd Application	4th Application	5th Application	
Apple—(Canker worm, codling moth, bud moth, scab.)	Spray before buds start, using copper sulphate solution.	After the blossoms have formed, but before they open, Bordeaux and Paris green or Whale Oil Soap.	Within a week after blossoms have fallen, Bordeaux and Paris green, or Whale Oil Soap.	10 to 14 days later, repeat.	10 to 14 days later, Bordeaux or weak copper sulphate.	
Bean-(Anthracnose)	When blossoms appear, spray with Bordeaux.	10 days later repeat.	10 to 14 days later, weak copper sulphate solution.	Repeatlast, if necessary.		
Cabbage — (Worms, aphis.)	When worms first appear, Slug Shot, kerosene emulsion, or Paris green.	If worms or aphides are present, repeat if plants are not head- ing, using emulsion for aphis.	If aphides persist, or if worms reappear, use kerosene emulsion, if plants are not heading.	After heads form, use saltpetre for worms, a teaspoonful to a gallon of water, emulsion for aphides.	' Repeat, if necessary	
Carnation—(Rust and other fungous diseases.)	When planted out, dip in Bordeaux.	7 to 12 days later, spray plants with Bordeaux.	Repeat at intervals of a week or 10 days until blossoms open.	While in bloom spray every week with the dilute copper sulphate solution.		
Cherry—(Rot, aphis, curculio and slug.)	Before buds start, use copper sulphate solution. For aphis, kerosene emulsion.	When fruit has set, Bordeaux and Paris green.*	10 to 12 days later, if signs of rot appear, repeat.	10 to 12 days later, copper sulphate solution, weak.	Repeat, if necessary	
Currant-(Worms, mildew.)	As soon as worms are seen, Paris green, Slug Shot or Helle- bore.	If they reappear, repeat, adding Grape Dust, Bordeaux for mildew.†	If worms still trouble, pyrethrum or hellebore.†			
Gooseberry — (Mildew, worms.)	As leaves open, Bordeaux, Paris green, Slug Shot or Hellebore.	In 10 to 14 days repeat with both.	10 to 14 days later, sulphide of potassium on English varieties.	10 to 14 days later, repeat, if necessary.	If mildew persists after crop is gathered, Grape Dust or Bordeaux.	
Grape —(Flea-beetle, fungous diseases.)	Before buds burst, copper sulphate solu- tion and Paris green.	When first leaves are half grown, Grape Dust, Bordeaux or Paris green.	As soon as fruit has set, repeat.*	10 to 14 days later, Bordeaux mixture, if disease is present.	If necessary, very weak copper sulphate solution.	
Nursery Stock- (Fungous diseases.)	When buds burst, Bordeaux.	Repeat at intervals	of 10 to 14 days.			
Peach, Apricot— (Leafcurl, curculio, mildew and rot.)	Before buds swell, copper sulphate solution.	As soon as fruit has set, Bordeaux and Paris green, or Whale Oil Soap.*	10 to 12 days later, repeat.	10 to 12 days later, repeat.	If rot persists, use very weak copper sul- phate solution every 5 to 7 days.	
Pear - (Leaf blight, scab, psylla and codling moth.)	Before buds start, copper sulphate solution.	Within a week after blossoms fall, Bor- deaux and Paris green or Whale Oil Soap.	10 to 12 days later, repeat.	10 to 16 days later, Bordeaux.	10 to 16 days later. Bordeaux.†	
Plum—(Black knot, rot and all fungous diseases, curculio.	As buds start, cop- persulphate solution. Cut out knot and burn	When fruit has set, Bordeaux and Paris green, or Whale Oil Soap.*	10 to 12 days later, repeat.	10 to 20 days later, Bordeaux.	Weak copper sulphate solution, as is necessary.	
Potato — (Beetles, scab, blight.)	For scab, soak seed in corrosive sublimate solution (2 cz. in 16 gallons of water for 90 minutes)	Paris green or Slug	Repeat whenever necessary.	When blight of the leaves is accompanied by rot of the tubers, Bordeaux.	Repeat, if necessary.	
Quince — (Leaf and fruit spot rot.)	Before buds start, copper sulphate solution,	When fruit has set, Bordeaux and Paris green, or Whale Oil Soap.*	10 to 12 days later, repeat.	10 to 20 days later, Bordeaux.	Bordeaux or copper sulphate solution, as is necessary.	
Raspberry, Black- berry — (Anthrac- nose, rust.)	Cut out badly diseased canes. Spray with copper sulphate solution before growth	When new canes are 1 foot high, spray with Bondeaux mixture.	10 to 14 days later, weak copper sulphate solution.	When crop is gathered, remove old canes, thin new ones and spray with Bordeaux	Special Notes.	
Rose—Mildew, black spot, red spider, aphis.)	starts. Mildew: Keep heating pipes painted with equal parts lime and sulphur mixed with water to a paste.	Lilack Spot: Spray plants once a week with weak copper sul- phate	Red Spider: Fir Tree Oil or kerosene emul- sion to under side of foliage.	mixture. Aphis: Kerosene emulsion or Fir Tree Oil.	For Black Knot on cherries and plums, cut out and destroy by burning the diseased parts as soon as dis- covered.	
Strawberry —(Rust)	Just before blossoms open, Bordeaux and Paris green.	When fruit has set, Bordeaux,* or weak copper sulphate solu- tion.	As soon as berries are harvested, Bordeaux if to be kept longer.		For Borers in trunk of tree, apply Whale Oil Soap with a brush.	
Tobacco—(Worms.) Tomato — (Rot and blight, worms.)	Paris green. When first fruits have set, Bordeaux.	Spray at intervals. If disease appears, repeat* or use weak copper sulphate solu-	If necessary, spray with weak copper sulphate solution.		If Red Rust appears the entire stools affected should be cut out and burned.	
Violet — (Blight, red spider.)	When blight is first seen, weak copper sul- phate. Kerosene emul- sion for insects.	Repeat at intervals of 10 to 20 days, as necessary for blight.	Note — Use kerosene emulsion very weak.	·	Young Plants should be sprayed with Bordeaux mixture at the time of the first and third applications	
Vines — Cucumber and Melon.	Slug Shot or Tobacco Dust.	Repeat at intervals.			to bearing plants.	

Explanation.—Whenever an asterisk [*] is used, it cautions against spraying with poisons while the plants are in blossom; a dagger [†] indicates that there is danger of making an application within 3 weeks of the time the fruit is to be used as food. While the number of applications recommended will be found desirable, in seasons when the fungi are less troublesome a smaller number may often suffice.

FORMULAS...

BORDEAUX MIXTURE.

Copper sulphate, 4 lbs.; Quick lime, 4 lbs.;
Paris green [for leaf eating insects], 4 oz.;
Water [one barrel], 40-50 gals.
To prevent potato rot, 6 lbs. of copper sulphate is used instead of 4.

KEROSENE EMULSION.

For sucking insects.

Kerosene [coal oil], 2 gals.; Rain water, 1 gal.; Soap ½ lb. To be diluted before use with 9 parts of water.

PARIS GREEN AND WATER.

For insects which eat foliage. Paris green, 1 lb.; Lime [fresh], 1 lb.; Water 200 gals.

Our Celebrated EMERALD OR CITY PARK LAWN GRASS SEED.

THIS SEED IS EQUAL OR SUPERIOR TO ANY LAWN GRASS SEED OFFERED UNDER ANY NAME.

1/2 lb. 15 cts; 1 lb. 25 cts; 2 lbs. 50 cts.; 5 lbs. \$1.00; 16 lbs. (1 bu.) \$3.00.

(5 cts. ½ lb. and 10 cts. per lb. extra, if sent by mail.)

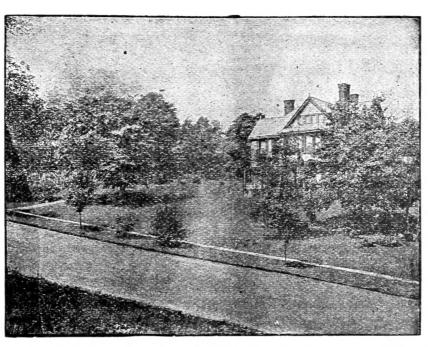

THIS LAWN MADE FIRST YEAR FROM OUR SEED

Is composed exclusively of the very best varieties of grass, such as long experience has shown to be best adapted to pro-duce a thick, heavy, carpet-like

One of the greatest troubles One of the greatest troubles in obtaining a good lawn is to get it free from weeds. These, while not always in the seeds, but quite often in the ground, or come from the use of stable manure, are nevertheless always objectionable. Our customers can rely in buying Our Emerald Lawn Grass Seed, on it being the very best seed obtainable For a new lawn, sow 4 to 5 bu. to the acre For renovating sow 2 to 3 bu. to

Directions for First get the Lawn. the ground in the desired shape and grade, drain it where necessary, and pulverize the soil, removing roots, stones, the soil, removing roots, stones, etc., so as to have an even and smooth surface. To secure the best results, use our seed liberally 4 to 5 bu. per acre for new lawns being about the right quantity, (1 lb. to about 300 square feet). 2 to 3 bu. per acre for renovating.

Let the grass get a start of three or four inches before cutting as the growth is retarded by too early cutting. After this it should be cut with a lawn mower every ten days, and rolled whenever the ground is soft enough for the roller to make an impression.

RESIDENCE OF J. CHAS. McCULLOUGH.

GRUB KILLER

(An Insecticide)

During the summer large patches of lawns die out without apparant cause, and upon investigation find that it is caused by White Grubs killing

To remedy this evil, we offer

"Grub Killer"

a combination of chemicals which destroys the grub worms and ants and prevents the growth of moss, also sweetens sour ground.

Apply broadcast at the rate of about 200 to 300 pounds per acre. Never use stable or vegetable manure, as same is filled with eggs of the grubs.

10 lbs. 40 ets.; 35 lbs. \$1.00. 50 lbs. \$1.25; 100 lbs. \$2.00.

FOR GOLF LINKS.

We have always on hand all the valuable natural grasses of Europe and America and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the requirements of the links may be, for poor land or rich, high and dry or low or wet.

Golf Link Mixture—For the grounds in general, per bushel \$2.25.
